Choral Conducting and the Construction of Meaning Liz Garnett, 2017-07-05 It is a truism in teaching choral conducting that the director should look like s he wishes the choir to sound The conductor s physical demeanour has a direct effect on how the choir sings at a level that is largely unconscious and involuntary It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery but also different gestural vocabularies which are shared not only between conductors within that tradition but also with the singers It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening But how can these forms of physical communication be explained Do they belong to a pre cultural realm of primate social bonding or do they rely on the context and conventions of a particular choral culture Is body language an inherent part of musical performance styles or does it come afterwards in response to music At a practical level to what extent can a practitioner from one tradition mandate an approach as good practice and to what extent can another refuse it on the grounds that we don t do it that way This book explores these questions at both theoretical and practical levels It examines textual and ethnographic sources and draws on theories from critical musicology and nonverbal communication

studies to analyse them By comparing a variety of choral traditions it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level and in what ways they are constructed within a specific idiom Its findings will be of interest both to those engaged in the study of music as a cultural practice and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles **The ^AOxford Handbook of Choral Pedagogy** Frank Abrahams,Paul D. and disciplinary borders and to encourage debates around the musical and social function of choirs in modern society as mirroring collective and individual needs for meaning music making and well being In the introductory chapter the editors describe choral practice as a field of simultaneous re presentation re production and re creation and suggest that these three aspects may be seen as umbrella themes for the fifteen chapters of the anthology The authors come from Sweden Norway Finland Estonia Germany United Kingdom Portugal and Belgium and explore choral practice from differing theoretical and methodological starting points Together they contribute to a transdisciplinary discussion about the origins functions and meanings of choral singing

Leading Musically Dag Jansson, 2018-04-17 Musical leadership is associated with a specific profession the conductor as well as being a colloquial metaphor for human communication and cooperation at its best This book examines what musical leadership is by delving into the choral conductor role what goes on in the music making moment and what it takes to do it well One of the unique features of the musical ensemble is the simultaneity of collective discipline and individual expression Music is therefore a potent laboratory for understanding the leadership act in

the space between leader and team The musical experience is used to shed light on leading and following more broadly by linking it to themes such as authority control empowerment intersubjectivity sensemaking and charisma Jansson develops the argument that musical leadership involves the combination of strong power and deep sensitivity a blend that might be equally valid in other leadership domains Aesthetic knowledge and musical perception therefore offer untapped potential for leadership and organisational development outside the art domain
