

CHRISTIANITY AND HUMAN RIGHTS

Andrew S Kulikovsky*

ABSTRACT

Modern day international relations are dominated by human rights talk and many political causes around the world today have been framed in terms of human rights. But how are human rights defined and where do they come from? Existing human rights instruments are merely declarative and offer no ontology or justification for their declarations. This paper demonstrates that one's conception of human rights will always be derived from their ontological notions about humans in general, whether they have rights, the nature of those rights, why they exist, how we can identify them, and how all this knowledge may be justified. Moreover, only Christianity offers the required 'high anthropology' and the moral and ethical framework to substantiate and enforce the kinds of rights specified in Articles 1-21 of the Universal Declaration on Human Rights.

I INTRODUCTION

Modern day international relations are dominated by human rights talk and many political causes around the world today have been framed in terms of human rights. Almost all governments and world leaders accept the notion of human rights, even if they only pay lip service to upholding and enforcing them.

But what are these human rights and where do they come from? Are they universal or cultural? Can each culture invent their own? Is there a religious aspect to them?

This paper examines all these questions and then focuses on the relationship between human rights and Christianity, and how human rights may be viewed from the perspective of Biblical Christianity.

This UN resolution, passed in 1948 at the end of the Second World War in response to the horrific abuses of prisoners, civilians, and minority groups—especially by the Axis powers—lays out a set of rights that all human

Christian Human Rights Samuel Moyn, 2015-09-04 In *Christian Human Rights* Samuel Moyn asserts that the rise of human rights after World War II was prefigured and inspired by a defense of the dignity of the human person that first arose in Christian churches and religious thought in the years just prior to the outbreak of the war. The Roman Catholic Church and transatlantic Protestant circles dominated the public discussion of the new principles in what became the last European golden age for the Christian faith. At the same time, West European governments after World War II, particularly in the ascendant Christian Democratic parties, became more tolerant of public expressions of religious piety. Human rights rose to public prominence in the space opened up by these dual developments of the early Cold War. Moyn argues that human dignity became central to Christian political discourse as early as 1937. Pius XII's wartime Christmas addresses announced the basic idea of universal human rights as a principle of world and not merely state order. By focusing on the 1930s and 1940s, Moyn demonstrates how the language of human rights was separated from the secular heritage of the French Revolution and put to use by postwar democracies governed by Christian parties, which reinvented them to impose moral constraints on individuals, support conservative family structures, and preserve existing social hierarchies. The book ends with a provocative chapter that traces contemporary European struggles to assimilate Muslim immigrants to the continent's legacy of Christian human rights.
