

Crawfish Dissection

Directions and Questions:

You will need a preserved crawfish, dissecting scissors, a dissecting pan with a rubber bottom, a dissecting probe, and some dissecting pins. Looking at the materials and lab we will be using, what are the safety precautions we should take to protect ourselves and materials during the investigation?

- 1) Use the picture below to help you explore the anatomy of the crawfish.

- 2) At the base of each antenna is a nephridia pore where the crawfish urinates out of its face. You should be able to fit the end of your probe in the opening. What do you think is the function of the antennae and antennules?
- 3) Find the mouth on the face of the crawfish. What direction do the jaws (mandibles) move?
