

# 1.4 Safety Regulations

During power, erection and assembly work only the crane operator may be on the crane (and he must be in the crane operator's cab). Remaining personnel must remain clear of the hazardous area on and around the crane. The only exception to this rule is when the counterweight is being lifted and when a load is being attached or released with the help of a filer.

When stacking the counterweight the person attaching the equipment must leave the crane and the steering area as soon as the erection work is completed. During stacking, the person attaching the equipment must remain outside the hazardous area.

When attaching and disconnecting the load, particular care should be taken as a result of swinging loads or hook blocks. The person attaching the equipment must be prohibited on handling hook blocks. Once the load has been attached or released, the filer must leave the steering or hazardous area immediately.

The filer must be easily recognizable to the crane operator. The filer must wear one or more means of identification e.g. jacket, helmet, special colors, armbands, signalling discs.

These means of identification should be in a distinctive colour and where possible of an identical design and must be exclusive to the filer.
