Deploying Openstack Ken Pepple:

Deploying OpenStack Ken Pepple, 2011-07-25 OpenStack was created with the audacious goal of being the ubiquitous software choice for building public and private cloud infrastructures. In just over a year it's become the most talked about project in open source. This concise book introduces OpenStack's general design and primary software components in detail and shows you how to start using it to build cloud infrastructures. If you're a developer, technologist, or system administrator familiar with cloud offerings such as Rackspace Cloud or Amazon Web Services, *Deploying OpenStack* shows you how to obtain and deploy OpenStack software in a few controlled scenarios. Learn about OpenStack Compute (known as Nova), OpenStack Object Store (Swift), and OpenStack Image Service (Glance). Understand common pitfalls in architecting, deploying, and implementing your cloud infrastructure with OpenStack. Determine which version of the OpenStack code base best suits your deployment needs. Define your deployment scenario and finalize key design choices. Install Nova on a single node with either the StackOps distro or an Ubuntu package. Be familiar with important configuration options and important administrative commands.

Fuzzy Systems, Knowledge Discovery and Natural Computation Symposium Liangshan Shao, Jinguang Sun, Xiaowei Hui, 2013-11-20 The Fuzzy Systems Knowledge Discovery and Natural Computation Symposium FSKDNC 2013 was successfully held from 24 to 25 July 2013 in Shenyang, China. The Symposium was a platform for authors to present their recent development on fuzzy systems, knowledge discovery, and natural computation, i.e., intelligent techniques inspired from nature such as neural networks, genetic algorithms, and particle swarm optimization. The Symposium attracted numerous submissions from around the globe. Each submitted paper was rigorously reviewed by the program committee and additional reviewers based on originality, significance, and quality of the research, clarity of the presentation, and relevance to the Symposium theme. 60 papers are included in the Symposium proceedings after the review process. The great efforts of the authors, the Organizing Committee members, the Program Committee members, and the additional reviewers are acknowledged here. The Symposium would not have been possible without the support from Liaoning Technical University. The professional and courteous staff from DEStech Publications Inc. also deserves special credits.

Software Defined Systems Deze Zeng, Lin Gu, Shengli Pan, Song Guo, 2019-11-25 This book introduces the software defined system concept, architecture, and its enabling technologies such as software defined sensor networks (SDSN), software defined radio (SDR), cloud fog radio access networks (CF-RAN), software defined networking (SDN), network function virtualization (NFV), software defined storage, virtualization, and Docker. The authors also discuss the resource allocation and task scheduling in software defined system, mainly focusing on sensing, communication, networking, and computation. Related case studies on SDSN, CF-RAN, SDN, NFV are included in this book, and the authors discuss how these technologies cooperate with each other to enable cross resource management and task scheduling in software defined system. Novel resource allocation and task scheduling algorithms are introduced and evaluated. This book targets researchers, computer scientists, and engineers who are interested

in the information system softwarization technologies resource allocation and optimization algorithm design performance evaluation and analysis next generation communication and networking technologies edge computing cloud computing and IoT Advanced level students studying these topics will benefit from this book as well **IBM Software Defined**
