two volumes of proceedings were required to publish all contributions. The books represent a substantial body of work in four years. *Physical Modelling in Geotechnics* contains 230 papers including eight keynote and themed lectures representing the state of the art in physical modelling research in aspects as diverse as fundamental modelling including sensors imaging modelling techniques and scaling onshore and offshore foundations dams and embankments retaining walls and deep excavations ground improvement and environmental engineering tunnels and geohazards including significant contributions in the area of seismic engineering. ISSMGE TC104 have identified areas for special attention including education in physical modelling and the promotion of physical modelling to industry. With this in mind there is a special themed paper on education focusing on both undergraduate and postgraduate teaching as well as practicing geotechnical engineers. Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called megafuges of 1000gtonne capacity or more capable of modelling the largest and most complex of geotechnical challenges. *Physical Modelling in Geotechnics* will be of interest to professionals engineers and academics interested or involved in geotechnics geotechnical engineering and related areas. The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering ISSMGE. City University of London are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference Eurofuge ten years ago in 2008. Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers in particular the opportunity to attend an international conference in this rapidly evolving specialist area. This is volume 1 of a 2 volume set. Hydraulic Fracturing Michael Berry Smith, Carl Montgomery, 2015-12-16. Hydraulic Fracturing effectively busts the myths associated with hydraulic fracturing. It explains how to properly engineer and optimize a hydraulically fractured well by selecting the right materials evaluating the economic benefits of the project and ensuring the safety and success of the people environment and equipment. From data estimation. *Coastal Sediments 2019 - Proceedings Of The 9th International Conference* Ping Wang, Julie D Rosati, Mathieu Vallee, 2019-05-17. This Proceedings contains over 260 papers on cutting edge research presented at the 9th International Conference on Coastal Sediments 2019 CS19 held in Tampa St Petersburg Florida USA from May 27-31 2019. This technical specialty conference is devoted to promoting an interdisciplinary exchange of state of the art knowledge among researchers in the fields of coastal engineering geology oceanography and related disciplines. With the theme of Advancing Science Engineering for Resilient Coastal Systems this Proceedings covers a wide range of research topics on coastal sediment processes from nearshore sediment transport and modelling to beach processes shore protection and coastal management. *Practical Rock Mechanics* Steve Hencher, 2015-08-28. This text provides an introduction for graduate students as well as engineering

geologists and geotechnical engineers It is also relevant to those working in nuclear waste disposal and oil and gas production The early chapters deal with fundamental mechanics and physics as they apply to rock masses It provides an introduction to the geological processes that give rise to the nature of rock masses and control their mechanical behavior It discusses stresses in the earth s crust and explains methods of measurement and prediction
