Educational Leadership and Moral Literacy Patrick M. Jenlink, 2014-03-18 What makes a moral person moral Who decides what morality means What makes leadership practice moral In today's schools what stands as moral leadership These are questions that reflect the complexity integral to the calculus of human morality especially in a world that is defined daily by its variant meanings of morality its acts of immorality The school as an educational setting is or should be a decidedly moral center of the society it is the natural intersect between the family and the multi dimensional nature of public life Educational Leadership and Moral Literacy addresses these questions situating the reader in a conversation that examines the meaning and nature of moral leadership through the lens of moral literacy and the dispositional aims of moral leadership in educational settings The contributing authors extend an argument that the work of leader educators and practitioners alike must continuously be re articulated around the dispositional aims aligned with a moral democratic education Educators must be concerned with developing the moral intellectual and aesthetic dimensions of the educational leader as a moral person

Philosophical Perspectives A Visual History of American Education **Educating Moral Sensibilities in Urban Schools**

,2019-02-11 Nowadays schools face the challenge of creating pedagogical environments that are sensitive to numerous
individual backgrounds in order to support students social and academic success Urban schools are communities with rich
possibilities to learn how to think feel and act morally In this task principals teachers parents and students of the schools
each have their own voice All these voices have to be heard in order to build communities with moral sensibilities This book
brings together recent work by international researchers from nine countries in the fields of moral development and
citizenship education The book consists of twelve chapters and it is divided into three parts While the first part deals with the
voices of urban school educators the second part contains chapters with the focus on students The third part is about
curriculum programs and practices in schools that contribute to the education of moral sensibilities in the school
communities This book can be used as a textbook in moral and citizenship education or as an updated research report on
international research on moral sensibilities Encyclopedia of Educational Reform and Dissent Thomas C.

Hunt,2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational
dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home
schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is
not exceptional For instance consider the past progressive education open education the junior high school the middle school
Life Adjustment education career education vocational education the comprehensive high school school to work year round
schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced
instruction modular scheduling site based management all presented as the way to reform American schools at least in part
Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman
Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting
movements while not as numerous and certainly not as well known in educational circles count the various faith based
schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and
vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia
bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and
students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key

themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily
