Religion and the Law in America Scott A. Merriman, 2007-05-18 This work is a comprehensive survey of one of the oldest and hottest debates in American history the role of religion in the public discourse The relationship between church and state was contentious long before the framers of the Constitution undertook the bold experiment of separating the two sparking a debate that would rage for centuries What is the role of religion in government and vice versa Religion and the Law in America explores the many facets of this question from prayer in public schools to the addition of the phrase under God to the Pledge of Allegiance from government investigation of religious fringe groups to federal grants for faith based providers of social services In more than 250 A Z entries along with a series of broad thematic essays it examines the groups laws and court cases that have framed this ongoing debate Through its careful balanced

exploration of the interaction between government and religion throughout the history of the United States the work provides all Americans students scholars and lay readers alike with a deep understanding of one of the central enduring issues in our history **Encyclopedia of Fundamentalism: Volume 3 of Religion & Society** Brenda Brasher, 2001-10-19

The Encyclopedia of Fundamentalism is the third volume of the acclaimed Religion Society series The Encyclopedia of Fundamentalism follows a broad definition of fundamentalism and covers fundamentalism across time and place although the emphasis remains on its primary manifestation Protestant fundamentalism in the United States It draws upon the work of historians sociologists religious scholars anthropologists political scientists and others **The Structure of Schooling** Richard Arum, Irene R. Beattie, Karly Ford, 2011

This second edition of The Structure of Schooling Readings in the Sociology of Education draws from classic and contemporary scholarship to examine current issues and diverse theoretical approaches to studying the effects of schooling on individuals and society This engaging reader exposes students to examples of sociological research on schools with a focus on the school as community It covers a wide range of issues including the development and application of social and cultural capital the effects of racial segregation and resource inequality on student outcomes the effects of tracking the role of gender class and race in structuring educational opportunity the effects of schooling on life course outcomes the significance of a school's institutional environment and the sociology of school reform movements *Science but Not Scientists* Vernon L. Grose, 2006-10-18

The historic Science Textbook Struggle a worldwide battle about the origin of the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced by apes those myths had only replaced ancient Greek mythology and were being passed off as scientific truths Caught in the crossfire between educators news media textbook publishers religious notables and world renowned scientists including nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All discussion about origins was transformed by admission that stories about them are based solely on personal views of individual scientists Remarkably 3 000 scientists around the world later signed an affirmation to assure that this issue of belief over fact in science never be repeated Wernher von Braun father of America's space program writes in the Foreword Vernon Grose in tracing out in Science But Not Scientists his personal involvement in the vortex of these two forces illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges

that message rather than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary by heeding this clarion call Resources in Education ,1990
