Creation Without Restraint Promoting Liberty And Rivalry In Innovation:

Creation Without Restraint Christina Bohannon, Herbert Hovenkamp, 2012-07-12 This title analyzes the current state of competition antitrust and intellectual property laws and proposes realistic reforms that will encourage innovation

Restoring Consumer Sovereignty Adrian Kuenzler, 2017-08-18 In today's highly concentrated marketplaces social and cultural values such as the lifestyle connotations that manufacturers and sellers confer upon their goods often shape consumers' prior beliefs and attitudes and affect the weight given to new information by consumers who make purchasing decisions in the marketplace. Such consumer goods present the largely unexplored problem of contemporary market regulatory theory according to which an increased amount of product differentiation has rendered everyday purchasing decisions such as the choice between an iPhone or a Samsung Galaxy Note as much a matter of personal identity rather than merely one of tangible product attributes. The basic challenge for market regulators and courts in such an environment is to make markets work effectively by providing a more efficient exchange of information about consumer preferences relating to tangible product features, functions and quality. This book demonstrates that improved legal policy can assist consumers and increase market efficiency. It acknowledges that once particular beliefs held by consumers have become culturally or socially entrenched they are very difficult to change. What is more, changing such beliefs is no longer simply a matter of educating people through the provision of additional information. Developing a novel framework through a detailed analysis of case law relating to consumer goods markets, this book delivers an accessible introduction to the law and economics of consumer decision making and a forceful critique of contemporary market regulatory policy.

IP and Antitrust: An Analysis of Antitrust Principles Applied to Intellectual Property Law, 3rd Edition Hovenkamp, Janis, Lemley, Leslie, Carrier, 2016-01-01

Competition Law's Innovation Factor Viktoria H S E Robertson, 2020-02-06 In recent years market definition has come under attack as an analytical tool of competition law. Scholars have increasingly questioned its usefulness and feasibility. That criticism comes into sharper relief in dynamic innovation-driven markets which do not correspond to the static markets on which the concept of the relevant market was modelled. This book explores that controversy from a comparative legal perspective taking into account both EU competition and US antitrust law. It examines the manifold ways in which courts and competition authorities in the EU and US have factored innovation-related considerations into market delineation covering innovative product markets, product differentiation, future markets, issues going beyond market definition proper such as innovation competition, innovation markets and potential competition, intellectual property rights, innovative aftermarkets and multi-sided platforms. This book finds that going forward the role of market definition in dynamic contexts needs to focus on its function of market characterisation rather than on the assessment of market power.

Competition Law and Policy in Latin America Paulo Burnier da Silveira, 2017-04-15 The Latin American countries both individually and as a community are poised to become increasingly important in the international recognition and

enforcement of competition law Recent policy developments in the region are particularly instructive on cross border mergers and international cartel investigations Although this book's focus is on Latin America its in depth exploration of areas such as information exchange among competition authorities compliance settlements and remedies are of great value and interest to competition lawyers and policymakers worldwide Including numerous recent cases and best practice indicators the contributors competition authority officials practitioners academics and economists cover such topics and issues as the following antitrust compliance programs competition advocacy bid rigging in public procurement predatory pricing use of indirect evidence in investigations shareholders damages claims relation between antitrust and intellectual property and merger control There are country specific chapters on particular developments in Argentina Brazil Chile Colombia Ecuador El Salvador Mexico and Paraguay Highlighting the importance of international competition regulatory cooperation this insightful book offers both practical guidance and food for thought to lawyers at national competition authorities corporate counsel and other competition law practitioners and academics

Venture Capital and the Inventive Process Tamir Agmon, Stefan Sjögren, 2016-05-21 The inventive process is the most important driver of economic growth Venture capital VC funds have contributed a small but critical part to the inventive process VC funds boost the inventive process by selecting a small number of radical ideas out a large flow of ideas and invest in their testing development and commercialization They bring together capital from general savings management capabilities and business experience When successful VC backed companies can contribute substantially to the welfare of society In this book VC funds are discussed in the context of macroeconomics industrial organization financial intermediation and financial economics The authors adopt a comprehensive overview to provide clearer insight into the role of VC funds in the capital market and the way they operate

TRIPS plus 20 Hanns Ullrich, Reto M. Hilty, Matthias Lamping, Josef Drexler, 2016-01-29 This book examines the impact and shortcomings of the TRIPS Agreement which was signed in Marrakesh on 15 April 1994 Over the last 20 years the framework conditions have changed fundamentally New technologies have emerged markets have expanded beyond national borders some developing states have become global players the terms of international competition have changed and the intellectual property system faces increasing friction with public policies The contributions to this book inquire into whether the TRIPS Agreement should still be seen only as part of an international trade regulation or whether it needs to be understood or even reconceptualized as a framework regulation for the international protection of intellectual property The purpose therefore is not to define the terms of an outright revision of the TRIPS Agreement but rather to discuss the framework conditions for an interpretative evolution that could make the Agreement better suited to the expectations and needs of today's global economy
