Diagnostische Tussentijdse Toets:

Handbook of Second Language Assessment Dina Tsagari, Jayanti Banerjee, 2016-03-07 Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment, with chapters on the purposes of assessment and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills, including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of voice in second language assessment, and assessment literacy for teachers and other test and score users.

Digitaal leren Ivan d' Haese, 2005 De informatie en communicatietechnologieën plaatsen alle actoren in het hoger onderwijs voor grote uitdagingen. Vrijwel alle aspecten van het onderwijs op het microniveau worden erdoor beïnvloed. De hoofdstukken in dit boek behandelen onderwerpen die herkenbaar zijn voor elke lesgever in het hoger onderwijs of daarbuiten: leerdoelen, leermaterialen, werkvormen, toetsbenaderingen, studiebegeleiding, toegang tot bibliotheken en bronnenmateriaal, enz. De auteurs geven telkens een toepassingsgerichte inleiding op het besproken thema. Daarbij putten ze uit de eigen onderwijspraktijk maar schetsen ook duidelijke trends voor de nabije toekomst. Toepassingen staan centraal. Een aantal hoofdstukken verschuift de aandacht naar thema's op opleidings- en instellingsniveau. Wat betekent bijv. het kiezen van een elektronische leeromgeving op instellingsniveau? Hoe de deskundigheidsbevordering van de staf aanpakken? Het boek is bedoeld voor wie betrokken is bij het ontwikkelen, uitvoeren, evalueren en begeleiden van het hoger onderwijs. Lesgevers halen er inspiratie en voorbeelden uit; studiebegeleiders zien kansen om hun bestaande aanpak te verrijken; en het boek biedt ook handvatten voor verantwoordelijken op instellingsniveau. Het boek is ook bruikbaar als handboek voor opleidingen van opleiders, vormingsmedewerkers en trainers.
