Galen, *De diebus decretoriis*, from Greek into Arabic

Glen M. Cooper, 2017-03-02 This volume presents the first edition of the Arabic translation by Hunayn ibn Ishaq of Galen s *Critical Days* *De diebus decretoriis* together with the first translation of the text into a modern language The substantial introduction contextualizes the treatise within the Greek and Arabic traditions Galen s *Critical Days* was a founding text of astrological medicine In febrile illnesses the critical days are the days on which an especially severe pattern of symptoms a crisis was likely to occur The crisis was thought to expel the disease producing substances from the body If its precise timing were known the physician could prepare the patient so that the crisis would be most beneficial After identifying the critical days based on empirical data and showing how to use them in therapy Galen explains the critical days via the moon s influence In the historical introduction Glen Cooper discusses the translation of the *Critical Days* in Arabic and adumbrates its possible significance in the intellectual debates and political rivalries among the 9th century Baghdad elite It is argued that Galen originally composed the *Critical Days* both to confound the Skeptics of his own day and to refute a purely mathematical rationalist approach to science These features made the text useful in the rivalries between Baghdad scholars Al Kindi d c 866 famously propounded a mathematical approach to science akin to the latter The scholar bureaucrat responsible for funding this translation Muhammad ibn Musa d 873 al Kindi s nemesis may have found the treatise useful in refuting that approach The commentary and notes to the facing page translation address issues of translation as well as important concepts
