intensive? Michel Griffon, 2013 Un d veloppement agricole durable cologique plus productif et quitable peut voir le jour Conduire une production agricole abondante tout en am liorant la qualit de l environnement est d sormais possible H ritier d une longue histoire de pens es et de recherche le terme agriculture cologiquement intensive d finit une agriculture qui utilise intensivement les fonctionnalit s des syst mes productifs Dans cet ouvrage l auteur nous d montre que la combinaison et l

amplification de fonctionnalités écologiques peuvent créer des synergies productives tout en réduisant les atteintes à l'environnement. Editeur : *Agriculture et biodiversité*, 2012-06. Limiter la perte de biodiversité à l'horizon 2010 tel est l'engagement souscrit par la communauté internationale. C'est dans ce contexte que s'inscrit cette expertise qui analyse les relations entre agriculture et biodiversité. L'agriculture en France par son emprise sur le territoire et la transformation des milieux naturels qu'elle opère entretient des liens troits avec la biodiversité. Dans les cinquante dernières années, l'intensification des pratiques agricoles qui s'est traduite par l'arasement des haies, le recours systématique des produits de synthèse pour protéger les plantes et fertiliser les sols a porté atteinte à cette biodiversité. L'expertise s'est intéressée non pas à la biodiversité remarquable illustrée par des espèces emblématiques comme le loup, mais à la biodiversité ordinaire : abeilles, syrphes, vers de terre qui contribuent au bon fonctionnement des écosystèmes à travers des services comme les services de pollinisation ou de contribution à la fertilité des sols, par exemple. La question posée conjointement par les ministères en charge de l'écologie et de l'agriculture concernait les conditions d'une meilleure synergie entre biodiversité et agriculture fondées sur une exploitation efficace des services fournis par la biodiversité dans les processus de production agricole. Que sait-on aujourd'hui des impacts positifs et négatifs de l'agriculture sur la biodiversité ? Quels services la biodiversité peut-elle apporter à l'agriculture et quelle hauteur de performance ? Comment favoriser au champ les synergies entre agriculture et biodiversité ? Quels instruments de politiques publiques économiques et juridiques sont susceptibles de promouvoir ces interactions ? C'est pour répondre à toutes ces questions que s'est mobilisé un groupe pluridisciplinaire d'experts : écologues, agronomes, microbiologistes, spécialistes de santé publique, économistes, juristes, sociologues de différentes institutions : Inra, CNRS, IRD, universités, écoles supérieures agronomiques en France et à l'étranger.

L'État de la sécurité alimentaire et de la nutrition dans le monde 2020 Organisation des Nations Unies pour l'alimentation et l'agriculture, Le Fonds international des Nations Unies pour le développement agricole, Les Fonds des Nations unies pour l'enfance, Le Programme alimentaire mondial, L'Organisation mondiale de la santé, 2020-10-12. Les mises à jour effectuées pour de nombreux pays ont permis cette année d'estimer la faim dans le monde avec une plus grande précision. En particulier, les nouvelles données disponibles ont permis de revoir toutes les estimations de la sous-alimentation faites pour la Chine depuis 2000, ce qui a entraîné une importante révision : la baisse du nombre de personnes sous-alimentées dans le monde. Néanmoins, cette révision confirme la tendance signalée dans les données précédentes : savoir que le nombre de personnes touchées par la faim dans le monde est en lente augmentation depuis 2014. Le rapport montre également que le fardeau de la malnutrition sous toutes ses formes reste un défi. Des progrès ont été réalisés en ce qui concerne le retard de croissance des enfants, l'insuffisance pondérale à la naissance et l'allaitement exclusif au sein, mais un rythme encore trop lent. Le surpoids chez les enfants ne s'améliore pas et l'obésité chez les adultes est en hausse dans toutes les régions. Le rapport complète l'évaluation de la sécurité alimentaire et de la nutrition par des projections de ce que le monde pourrait ressembler en 2030 si les tendances constatées ces dix dernières années se maintiennent. Ces projections montrent

que le monde n'est pas en voie d'atteindre l'objectif Faim zéro d'ici 2030 et malgré certains progrès la plupart des indicateurs ne se rapprochent pas non plus des cibles mondiales fixées en matière de nutrition. La situation des groupes les plus vulnérables en matière de sécurité alimentaire et de nutrition risque de se détériorer davantage en raison des conséquences sanitaires et socio-économiques de la pandémie de covid 19.
