Ibarra, Louxin Zhang, 2003-08-02 This book constitutes the refereed proceedings of the 8th Annual International Computing and Combinatorics Conference COCOON 2002 held in Singapore in August 2002 The 60 revised full papers presented together with three invited contributions were carefully reviewed and selected from 106 submissions The papers are organized in topical sections on complexity theory discrete algorithms computational biology and learning theory radio networks automata and formal languages Internet networks computational geometry combinatorial optimization and quantum computing

Cryptography and Computational Number Theory Kwok Y. Lam, Igor Shparlinski, Huaxiong Wang, Chaoping Xing, 2013-03-07 This volume contains the refereed proceedings of the Workshop on Cryptography and Computational Number Theory CCNT 99 which has been held in Singapore during the week of November 22-26 1999 The workshop was organized by the Centre for Systems Security of the National University of Singapore We gratefully acknowledge the financial support from the Singapore National Science and Technology Board under the grant number RP960668 M The idea for this workshop grew out of the recognition of the recent rapid development in various areas of cryptography and computational number theory The event followed the concept of the research programs at such well known research institutions as the Newton Institute UK Oberwolfach and Dagstuhl Germany and Luminy France Accordingly there were only invited lectures at the workshop with plenty of time for informal discussions It was hoped and successfully

achieved that the meeting would encourage and stimulate further research in information and computer security as well as in the design and implementation of number theoretic cryptosystems and other related areas Another goal of the meeting was to stimulate collaboration and more active interaction between mathematicians computer scientists practical cryptographers and engineers in academia industry and government
