Curriculum And Imagination Process Theory Pedagogy And Action Research:

Curriculum and Imagination James McKernan, 2007-08-07 Curriculum and Imagination describes an alternative process model for designing developing implementing and evaluating curriculum suggesting that curriculum may be designed by specifying an educational process which contains key principles of procedure This comprehensive and authoritative book offers a practical and theoretical plan for curriculum making without objectives shows that a curriculum can be best planned and developed at school level by teachers adopting an action research role complements the spirit and reality of much of the teaching profession today embracing the fact that there is a degree of intuition and critical judgement in the work of educators presents empirical evidence on teachers human values Curriculum and Imagination provides a rational and logical alternative for all educators who plan curriculum but do not wish to be held captive by a mechanistic ends means notion of educational planning Anyone studying or teaching curriculum studies or involved in education or educational planning will find this important new book fascinating reading

Action Research Jean McNiff, 2013 Since its first publication Action Research Principles and Practice has become a key text in its field This new updated edition clearly describes and explains the practices of action research and its underlying values and introduces important new ideas including all professionals should be reflective practitioners they should produce their personal theories of practice to show how they are holding themselves accountable for their educational influences in learning the stories they produce become a new people s history of action research with potential for influencing new futures This new edition has expanded in scope to contribute to diverse fields including professional development across the sectors and the disciplines It considers the current field including its problems as well as its considerable hopes and prospects for new thinking and practices Now fully updated this book contains A wealth of case study material New chapters on the educational significance of action research An overview of methodological and ethical discussion The book is a valuable addition to the literature on research methods in education and nursing and healthcare and professional education and contributes to contemporary debates about the generation and dissemination of knowledge and its potential influence for wider social and environmental contexts Practitioners across the professions who are planning action research in their own work settings will find this book a helpful introduction to the subject while those studying on higher degree courses will find it an indispensable resource

Transformative Learning and Teaching in Physical Education Malcolm Thorburn, 2017-04-07 Transformative Learning and Teaching in Physical Education explores how learning and teaching in physical education might be improved and how it might become a meaningful component of young people s lives With its in depth focus on physical education within contemporary schooling the book presents a set of professional perspectives that are pivotal for realising high quality learning and teaching for physical education With contributions from a range of international academics chapters critically engage with vital issues within contemporary physical education These include examples of complex learning principles in

action which are discussed as a method for bettering our understanding of various learning and teaching endeavours and which often challenge hierarchical and behaviourist notions of learning that have long held a strong foothold in physical education. Authors also engage with social ecological theories in order to help probe the complex circumstances and tensions which many teachers face in their everyday work environments where they witness first hand the contrast between discourses which espouse transformational change and the realities of their routine institutional arrangements. This book enables readers to engage in a fuller way with transformative ideas and to consider their wider implications for contemporary physical education. Its set of professional perspectives will be of great interest to academics, policymakers, teacher educators and teachers in the fields of physical education, health and well-being. It will also be a useful resource for postgraduate students studying in these subject areas. *Bridging Educational Leadership, Curriculum Theory and Didaktik*

Michael Uljens, Rose M. Ylimaki, 2017-10-04. This book is open access under a CC BY 4.0 license. This volume argues for the need of a common ground that bridges leadership studies, curriculum theory and Didaktik. It proposes a non-affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields. It concludes with implications of its coherent theoretical framing for future empirical research. Recent neoliberal policies and transnational governance practices point toward new tensions in nation-state education. These challenges affect governance, leadership and curriculum involving changes in aims and values that demand coherence. Yet the traditionally disparate fields of educational leadership, curriculum theory and Didaktik have developed separately both in terms of approaches to theory and theorizing in USA, Europe and Asia and in the ways in which these theoretical traditions have informed empirical studies over time. An additional aspect is that modern education theory was developed in relation to nation-state education which in the meantime has become more complicated due to issues of globalisation. This volume examines the current state of affairs and addresses the issues involved. In doing so it opens up a space for a renewed and thoughtful dialogue to rethink and re-theorize these traditions with non-affirmative education theory moving beyond social reproduction and social transformation perspectives. **Critical Pedagogy and Marx, Vygotsky and Freire** Luis S. Villacañas de

Castro, 2015-11-03. This book explores Marx's theory of the phenomenal forms in relation to critical pedagogy and educational action research, arguing that phenomenal forms pose a pedagogical obstacle to any endeavour that seeks to expand an individual's awareness of the larger social whole. *Teach Meaningful* Lauren Porosoff, 2020-07-15. *Teach Meaningful* is a practical guide to designing curriculum that meets standards, serves personal and institutional values and intentionally leads to successful student learning. Identifying which understandings, knowledge and skills are most important for students to learn is always a question of values, so getting clear on values gives teachers a starting place to design cohesive units, courses and programs. Written by a teacher for teachers, *Teach Meaningful* includes stories of failures and successes in designing curriculum from across subjects and grade levels, metaphors from everyday life to help teachers understand curriculum.

design as a process rooted in values and culminating in meaningful learning examples of essential questions assessment guidelines lesson calendars unit plans and curriculum maps exercises and templates teachers can use to create and assess curriculum protocols designed to encourage inclusive participation and critical reflection when colleagues look at curriculum together *Youth Work Practice* Tony Jeffs, Mark K. Smith, 2010-01-06 A contemporary reflection on current practice this book gets to the heart of what youth work is about It provides an in depth overview and analysis of practice addressing the many experiences of working with young people through insightful chapters written by practitioners themselves

Increasing Student Engagement and Retention Using Multimedia Technologies Laura A. Wankel, Patrick Blessinger, 2013-03-25 Multimedia and video related technologies are reshaping and reframing the practice of teaching and learning in higher education This volume critically examines new research on how multimedia technologies are being used in higher education to increase learner engagement and collaboration in and out of the classroom **Character Education**
