Paul Fabra

Capitalism Versus Anti Capitalism Capitalism Versus Anti Capitalism:

Capitalism Versus Anti-Capitalism Paul Fabra, 1993-01-01 Fabra's central thesis is that economics will not get out of the blind alley in which it has led itself and everyone else until it undertakes an epistemological inquiry into the sources of its biases. This book is concerned then with the most general structural problems that confront the economist. Covering every major theme of modern economics from the labor market to the gold standard, Fabra aims to show that the classical theories of Ricardo prevail over the more recent doctrines of both Marx and Keynes. He turns every major premise of economics on its head, starting with the reality of money and ending with the abolition of wage labor as a triumph of capitalism and market forces.

Anticapitalism and Culture Jeremy Gilbert, 2008-10-15 What does anticapitalism really mean for the politics and culture of the twenty-first century? Anticapitalism is an idea which, despite going global, remains rooted in the local, persisting as a loose collection of grassroots movements and actions. Anti-capitalism needs to develop a coherent and cohering philosophy, something which cultural theory and the intellectual legacy of the New Left can help to provide, notably through the work of key radical thinkers such as Ernesto Laclau, Stuart Hall, Antonio Negri, Gilles Deleuze, and Judith Butler. Anticapitalism and Culture argues that there is a strong relationship between the radical tradition of cultural studies and the new political movements which try to resist corporate globalization. Indeed, the two need each other: whilst theory can shape and direct the huge diversity of anticapitalist activism, the energy and sheer political engagement of the anticapitalist movement can breathe new life into cultural studies.

Capitalism Versus Anti-capitalism, 2019 Fabra's central thesis is that economics will not get out of the blind alley in which it has led itself and everyone else until it undertakes an epistemological inquiry into the sources of its biases. This book is concerned then with the most general structural problems that confront the economist. Covering every major theme of modern economics.

Mind Vs. Money Alan S. Kahan, For the past 150 years, Western intellectuals have trumpeted contempt for capitalism and capitalists. They have written novels, plays, and manifestos to demonstrate the evils of the economic system in which they live. Dislike and contempt for the bourgeoisie, the middle classes, industry, and commerce have been a prominent trait of leading Western writers and artists. *Mind vs. Money* is an analytical history of how and why so many intellectuals have opposed capitalism. It is also an argument for how this opposition can be tempered. Historically, intellectuals have expressed their rejection of capitalism through many different movements, including nationalism, anti-Semitism, socialism, fascism, communism, and the 1960s counterculture. Hostility to capitalism takes new forms today. The anti-globalization, Green, communitarian, and New Age movements are all examples. Intellectuals give such movements the legitimacy and leadership they would otherwise lack. What unites radical intellectuals of the nineteenth-century communists and fascists, of the twentieth-century anti-globalization protestors, and of the twenty-first century along with many other intellectuals not associated with these movements is their rejection of capitalism. Kahan argues that intellectuals are a permanently alienated elite in capitalist societies. In myriad forms and on many fronts, the battle between

Mind and Money continues today Anti Americanism is one of them Americans like to see their country as a beacon of freedom and prosperity But in the eyes of many European and American intellectuals when America is identified with capitalism it is transformed from moral beacon into the Great Satan This is just one of the issues Mind vs Money explores The conflict between Mind and Money is the great unresolved conflict of modern society To end it we must first understand it

Capitalism Versus Anti-capitalism, 2019 Fabra's central thesis is that economics will not get out of the blind alley in which it has led itself and everyone else until it undertakes an epistemological inquiry into the sources of its biases This book is concerned then with the most general structural problems that confront the economist Covering every major theme of modern economics

Uninspected Beliefs Brant Besser, Brook Besser, 2010 In the realm of political ideas most people develop their beliefs based on the opinions of family friends and teachers Their facts are then based on media sound bites and political ads that support these beliefs Few thoroughly inspect their political belief system because of lack of interest or because their busy lives leave little time for political education These uninspected beliefs have real consequences for everyone Apathy and misunderstanding of political issues are slowly whittling away our liberties and the only cure is knowledge In this book many common political beliefs are inspected in short but thorough discussions that average around three pages each This book allows even the busiest individual to become more politically educated a topic at a time Whether Democrat Republican Independent or undecided this book will help clarify many issues and help shape better informed decisions

How to Be an Anticapitalist in the Twenty-First Century Erik Olin Wright, 2021-04-13 What is wrong with capitalism and how can we change it Capitalism has transformed the world and increased our productivity but at the cost of enormous human suffering Our shared values equality and fairness democracy and freedom community and solidarity can provide both the basis for a critique of capitalism and help to guide us toward a socialist and democratic society Erik Olin Wright has distilled decades of work into this concise and tightly argued manifesto analyzing the varieties of anticapitalism assessing different strategic approaches and laying the foundations for a society dedicated to human flourishing How to Be an Anticapitalist in the Twenty First Century is an urgent and powerful argument for socialism and an unparalleled guide to help us get there Another world is possible Included is an afterword by the author's close friend and collaborator Michael Burawoy

The Great Regression Heinrich Geiselberger, 2017-05-11 We are living through a period of dramatic political change Brexit the election of Trump the rise of extreme right movements in Europe and elsewhere the resurgence of nationalism and xenophobia and a concerted assault on the liberal values and ideals associated with cosmopolitanism and globalization Suddenly we find ourselves in a world that few would have imagined possible just a few years ago a world that seems to many to be a move backwards How can we make sense of these dramatic developments and how should we respond to them Are we witnessing a worldwide rejection of liberal democracy and its replacement by some kind of populist authoritarianism This timely volume brings together some of the world's greatest minds to analyse and seek to understand

the forces behind this great regression Writers from across disciplines and countries including Paul Mason Pankaj Mishra Slavoj Zizek Zygmunt Bauman Arjun Appadurai Wolfgang Streeck and Eva Illouz grapple with our current predicament framing it in a broader historical context discussing possible future trajectories and considering ways that we might combat this reactionary turn The Great Regression is a key intervention that will be of great value to all those concerned about recent developments and wondering how best to respond to this unprecedented challenge to the very core of liberal democracy and internationalism across the world today For more information see www.thegreatregression.eu

The Courage of Hopelessness Slavoj Zizek, 2018-02-06 Maverick philosopher Slavoj Zizek returns to explore today's ideological political and economic battles and asks whether radical change is possible In these troubled times even the most pessimistic diagnosis of our future ends with an uplifting hint that things might not be as bad as all that that there is light at the end of the tunnel Yet argues Slavoj Zizek it is only when we have admitted to ourselves that our situation is completely hopeless that the light at the end of the tunnel is in fact the headlight of a train that fundamental change can be brought about Surveying the various challenges in the world today from mass migration and geopolitical tensions to terrorism the explosion of rightist populism and the emergence of new radical politics all of which in their own way express the impasses of global capitalism Zizek explores whether there still remains the possibility for genuine change Today he proposes the only true question is or should be this do we endorse the predominant acceptance of capitalism as fact of human nature or does today's capitalism contain strong enough antagonisms to prevent its infinite reproduction Can we he asks move beyond the failure of socialism and beyond the current wave of populist rage and initiate radical change before the train hits Zizek leaves no social or cultural phenomenon untheorized and is master of the counterintuitive observation The New Yorker

Between East and South Anna Calori, Anne-Kristin Hartmetz, Bence Kocsev, James Mark, Jan Zofka, 2019-10-21 During the Cold War alternative globalization projects were underway socialist Eastern Europe and left leaning countries in the Third World maintained close economic relations The two worlds traded and exchanged know how and technology This book examines the specific spaces of interaction of these exchanges and discusses the consequences for those projects of globalization undertaken in both world regions
