The Next Revolution in our Credit-Driven Economy Paul Schulte, 2015-06-29 Go inside the research to see the global consequences of unethical banking The Next Revolution in our Credit Driven Economy The Advent of Financial Technology integrates market theory and practice to help investors identify growth opportunities and to help regulators create a sustainable economic environment Author Paul Schulte former economic analyst with the National Security Council draws upon his own decade spanning research to demonstrate how unethical banking practices provide the brute force that drives political and economic crises worldwide By unbundling how credit markets work this authoritative guide provides deep insight into crisis avoidance and detection successful investment climates and the groundwork that must be in place for policy makers to build a sound basis for economic growth Clear succinct case studies provide examples of policy and its effects on economic stability giving you a stronger understanding of the network of forces that determine how loan deposit ratios behave around the world Countries that lend more than they save consistently get into trouble with catastrophic consequences for the rich and middle class as well as the politicians This book shows how credit excesses bring about price collapse in stocks currencies and real estate and provides direction for change in the context of global economics Dive deep into the mechanisms underlying the credit markets Learn how unregulated borrowing leads to socioeconomic crises Examine real world policy options through global case studies Discover how credit rises are best detected and avoided An economic climate in which even the smallest hiccup can have long lasting consequences should be the ideal impetus for a close scrutiny of global banking practices and economic policy The Next Revolution in our Credit Driven Economy takes you behind the scenes for a new perspective and a more informed look at where the world needs to begin changing The second half of the book will take a look at the revolution driving financial technology Companies in Silicon Valley and giants like Alibaba are

challenging the landscape for banking This has profound implications for policy makers banks and for a new class of entrepreneurs who are developing software which is taking away market share from bank and challenging decades old financial empires The book will explore the reasons why many global banks remain flat footed It will go into detail about the new companies and software that are moving in the Far East and with innovations in securities bonds foreign exchange retail lending and SME lending Lastly the book will look at the strategy behind Alibaba and how it will challenge many companies from a powerful base inside China

A Generic Approach for the Automated Notarization of Cloud Configurations Using Blockchain-Based Trust Thorsten Weber, 2023-10-05 The use of cloud applications is becoming increasingly popular due to their scalability and cost advantages However companies need help in adopting cloud applications due to their internal policies and compliance requirements Trust and security are crucial factors that influence the adoption of cloud applications This book proposes a cloud architecture that addresses this challenge by shifting the trust for compliance driven configurations of cloud applications from the cloud application provider to the blockchain The architecture was developed using design science research and evaluated using mixed method semi structured guided interviews The results show that the proposed architecture can significantly reduce adoption risk due to compliance driven cloud application configurations shifting trust from the cloud provider to the blockchain This book presents an innovative approach to address the challenge of adopting cloud applications and enhancing trust and security for businesses
