Capitals Of Capital Capitals Of Capital:

Capitals of Capital Youssef Cassis, 2010 useful reading for anyone interested in the antecedents of today's vibrant international financial markets **Capitals of Capital** Youssef Cassis, 2005 *Capitals of Capital* Youssef Cassis, 2006

International financial centres have come to represent a major economic stake. Yet no historical study has been devoted to them. Professor Cassis, a leading financial historian, attempts to fill this gap by providing a comparative history of the most important centres that constitute the capitals of capital: New York, London, Frankfurt, Paris, Zurich, Amsterdam, Tokyo, Hong Kong, Singapore, from the beginning of the industrial age up to the present. The book has been conceived as a reflection on the dynamics of the rise and decline of international financial centres, setting them in their economic, political, social, and cultural context. While rooted in a strong and lively historical narrative, it draws on the concepts of financial economics in its analysis of events. It should widely appeal to business and finance professionals as well as to scholars and students in financial and economic history.

Capital (Das Kapital) Karl Marx, 2023-12-26

Karl Marx's seminal work *Capital*, *Das Kapital*, delves into the intricacies of capitalist society through a rigorous analysis of economic systems, labor, and commodities. With a blend of philosophical discourse and economic theory, Marx employs a dialectical method that challenges contemporary capitalist ideologies. His exploration of concepts such as surplus value, alienation, and class struggle reveals the inherent contradictions within capitalism, making it a foundational text in both economics and political theory, notably influencing subsequent schools of thought including socialism and critical theory.

Marx, born in Prussia in 1818, was profoundly shaped by the socio-economic turbulence of his time, which included the Industrial Revolution and the rise of bourgeois capitalism. An ardent philosopher and economist, Marx spent much of his life analyzing the relationship between labor and capital. His long-standing collaboration with Friedrich Engels, as well as his immersion in contemporary social and political movements, fueled his desire to articulate the struggles of the working class, culminating in this masterwork.

Capital is more than a profound treatise on economics; it is a clarion call to assess the socio-political structures that govern our lives. Readers interested in understanding the roots of modern capitalism, as well as its critiques, will find this book indispensable. Marx's insights continue to resonate, prompting essential discussions about equity, labor rights, and the future of economic systems.

Marx's Capital and Hegel's Logic, 2014-04-17

This book provides a wide-ranging and in-depth reappraisal of the relation between Marx's economic theory in *Capital* and Hegel's *Logic*, by leading Marxian economists and philosophers from around the world. The subjects dealt with include systematic dialectics, the New Dialectics, materialism vs. idealism, Marx's inversion of Hegel's Concept logic, universality, particularity, singularity, Hegel's Essence logic, essence, appearance, Marx's levels of abstraction of capital in general, and competition and capital as Hegelian Subject. The papers in this volume were originally presented at the 22nd annual meeting of the International Symposium on Marxian Theory at Mount Holyoke College in August 2011. The twelve authors are divided between seven economists and five philosophers, as is fitting for the

interdisciplinary subject of the relation between Marx's economic theory and Hegel's logic Contributors are Chris Arthur Riccardo Bellofiore Roberto Fineschi Gaston Caligaris Igor Hanzel Juan Igo Carrera Mark Meaney Fred Moseley Patrick Murray Geert Reuten Mario Robles Tony Smith and Guido Starosta *Capital Cities/Les capitales* John Taylor,1993-12-15 An unusual look at the nature and role of capital cities around the world past present and future The 24 papers by scholars from many countries and disciplines present their thinking on capital cities with contributions from Amos Rapoport Claude Raffestin Peter Hall and Anthony Sutcliffe 16 papers in English 8 in French *The Alexandrian Corinthian Capital and its Role in the Evolution of the Corinthian Order in Hellenistic, Roman, and Late Roman Architecture* Ahmed M.

Bassioni,2022-04-21 This study discusses the evolution of the Corinthian capital in Antiquity and how this centred around Alexandria rather than Mainland Greece It tackles the rise of the Corinthian capital in Classical Greece and its adaptation on in Hellenistic Alexandria **Rethinking Capital** Richard Dien Winfield,2016-11-01 This book develops a comprehensive systematic economic theory conceiving how the dynamic of market relations generates an economy dominated by the competitive process of individual profit seeking enterprises The author shows how contrary to classical political economy and contemporary economics the theory of capital is an a priori normative account properly belonging to ethics Exposing and overcoming the limits of the economic conceptions of Hegel and Marx Rethinking Capital determines how the system of capitals shapes economic freedom jeopardizing the very rights in whose exercise it consists Winfield thereby provides the understanding required to guide the private and public interventions with which capitalism can be given a human face
