Car Sick Solutions For Our Car Addicted Culture:

Car Sick Lynn Sloman, 2006 This book is about de motorisation It explains how it is working and presents different application that we can find in different cities of the world It says that we need to change the way we think about traveling that we need to move away from a car centred to a people centred society **Driverless Cars: On a Road to Nowhere**

Christian Wolmar, 2018-01-18 Driverless cars are the future That is what the tech giants the auto industry and even the government want us to think Almost daily there are media stories about how we will soon all be able to rip up our driving licences sit in the back seat and let the car take us around But is this really going to happen Christian Wolmar has dug behind the hype and found a very different story We are nowhere near this driverless utopia Indeed it may prove to be impossible to reach And even if it were achievable does anyone want it Far from reducing traffic and pollution millions of zombie cars on the roads would make them worse Wolmar looks at the technical and other difficulties that make this driverless future a very uncertain proposition He finds that it is the tech companies and the auto manufacturers who are desperate to get us out of the driving seat and argues that far from making the roads safer driverless cars may well make them more dangerous This entertaining polemic sets out the many technical legal and moral problems that obstruct the path to a driverless future and debunks many of the myths around that future s purported benefits **Car** Gregory

Votolato, 2015-06-15 Whether you drool over their horsepower or decry their emissions the car is an important and ubiquitous part of nearly all of our lives And the history of their design and the innovations of their technologies can tell us a lot about how our values and attitudes have changed In this book Gregory Votolato shows us how and why the automobile has become since its rise in the late nineteenth century at once an object of unparalleled popular desire and a hugely problematic emblem of the modern world Votolato explores the ways that our love hate relationship with the car has been intimately connected with car design He tells the story of the rise of the private passenger car and all the psychological social and economic functions it has come to serve beyond mere transportation Introducing readers to the automotive design process he traces the lifecycle of the car from the drawing board to the scrapyard offering insights from key figures in the industry as well as a careful evaluation of the car s enormous environmental impact At the same time he looks at the many cultures tied into the automobile from drag racing and customizing to the luxury coachcraft of the classic era Along the way he takes us for a ride in some of the most famous cars ever to have had their tires inflated from the Model T to the Tesla The result is a top down thrilling burn through the history of one of our most beloved and lamented inventions *The Routledge Handbook of Mobilities* Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally

socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study The Limits to Travel David Metz, 2012-05-16 A highly readable but challenging perspective on the established conventions of transport policy planning and economic appraisal a fascinating tour d horizon of topical transport issues David Quarmby CBE chairman of the Independent Transport Commission David Metz again challenges conventional thinking in transport through a fundamental reinterpretation of the limits of travel time and human mobility arguing that there should be maximum limits set for mobility if we are to avoid unacceptable environmental damage David Banister professor of transport studies Oxford University The first EBOOK: Transport, Environment And Society Michael Cahill, 2010-02-16 I have no hesitation in suggesting that it should be required reading for students of transport studies and social policy if for no other reason than because it provides an excellent overview of a particular perspective on transport and the consequences of automobility for particular groups Justin Spinney University of East London UK It is an excellent and comprehensive means of providing an introduction to those not familiar with social issues associated with contemporary transport this reviewer recommends this book as an essential reading for all involved in the social policy field not just students Graham Currie Monash University Australia This topical book examines the consequences of our car based transport system for social policy Readers are introduced to the complexity of the relationship between transport and society together with the debates about the social inequalities produced by the transport system and the connection between social inequality social exclusion and transport disadvantage The social inequalities which result from the ways we travel are related to key areas of social policy The book also traces the move from

public to private transport during the last half century in the UK Adopting a lifecourse approach *Transport Environment and Society* demonstrates the impact of car dependence on children adults disabled people and older people demonstrating the ways in which transport and mobility policy have changed perceptions of freedom risk and safety Throughout the book the environmental impact of transport is kept to the fore Reviewing the evidence on the social impact of transport the book discusses the ways in which a sustainable transport policy could emerge and argues that questions of mobility and transport should be integral to social policies which are concerned with environmental and social justice The book assumes no previous knowledge of transport or transport policy and outlines the roles and functions of the relevant departments and agencies Written primarily for social science students *Transport Environment and Society* is also key reading for environmental studies and transport studies students who need to understand the impact of transport on society

Boy Racer Culture
Karen Lumsden, 2013-02-11 On the public roads boy racers are a foreboding presence viewed with suspicion and derision by the respectable motorist The problem of the young male driver is one which has plagued authorities and governments due to youths acclaimed propensity to engage in deviant and dangerous driving behaviours *Boy Racer Culture* sheds light on the boy racer phenomenon through ethnographic research with the notorious Bouley Basher culture in the city of Aberdeen Scotland and the moral panic on the part of outside groups including the local community police politicians and media This book examines the creation of masculine and feminine identities in a traditionally male dominated subculture through car related rituals such as modding subcultural media and events and the quest for celebrity status via public performances *Boy Racer Culture* challenges common misconceptions surrounding the boy racer the problematic young male motorist and the car modifier It will be essential reading for an international audience including sociologists and criminologists particularly those with an interest in youth culture subcultures moral panics car culture anti social behaviour and the governance and policing of the roads

Ecotopia 2121 Alan Marshall, 2016-10-04 A 2016 Green Book Festival Future Forecasts Winner A stunningly original lushly illustrated vision for a Green Utopia published on the 500th anniversary of the original Big Idea Five hundred years ago a powerful new word was unleashed upon the world when Thomas More published his book *Utopia* about an island paradise far away from his troubled land It was an instant hit and the literati across Europe couldn't get enough of its blend of social fantasy with a deep desire for a better world Five hundred years later *Ecotopia 2121* once again harnesses the power of the utopian imagination to confront our current problems among them climate change and offer a radical alternative vision for the future of our troubled planet Depicting one hundred cities around the globe from New York to San Francisco London Tokyo Sydney Rio de Janeiro Mexico City Beijing Vienna Singapore Cape Town Abu Dhabi and Mumbai Alan Marshall imagines how each may survive and prosper A striking full color scenario painting illustrates each city The chapters tell how each community has found either a social or technological innovation to solve today's crises Fifteen American cities are covered Around the world urban planners like to tailor scenarios for the year 2020 to take advantage of

the metaphor of 20 20 vision In Ecotopia 2121 the vision may be fuzzy but its sharp insights captivating illustrations and playful storytelling will keep readers coming back again and again **The Economical Environmentalist** Prashant Vaze,2009-12-01 Reducing your carbon emissions in an economic down turn can be challenging but saving the planet doesn't have to cost you more Tough economic times need not relegate concerns for the planet to the back burner The author is an environmental economist trying to live a low carbon life in London He worked for 15 years in the UK's Office of Climate Change the Prime Minister's Strategy Unit and the Department of the Environment So far so good But he has kids A family to visit in India A hectic job In distilling and building on his own experience of trying to live a low carbon life he helps us navigate the choices that confront us all families singletons pensioners when making decisions about what to eat what to buy how to travel and how to keep warm in the era of climate change and economic turmoil He works out the sums and lets us know which choices will make the biggest difference and which are false savings His book is an irreverent but seriously rigorous reference guide to low cost low carbon living for everyone in any location in tough times It's brimming with up to date information on current and future technologies tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low carbon lives **Traffic jam** Iain Docherty,Jon Shaw,2008-10-27 This informed and lively book offers a timely analysis of the UK government's sustainable or subsequently integrated transport policy 10 years after the publication of A New Deal for Transport Better for Everyone Written by prominent transport experts and with a foreword by Christian Wolmar the book identifies the modest successes and sadly the far more significant failures in government policy over the last decade The authors also uncover why it has proved so difficult to adopt a more sustainable approach to transport and break Britain's love affair with the car The book reviews the links between the idea of sustainability and transport policy and provides an up to the minute analysis of the political realities surrounding the delivery of a sustainable transport agenda in the UK It picks up on the principal components of A New Deal for Transport and evaluates to what extent these have or haven't been delivered in England Scotland Wales and Northern Ireland The contributors analyse why delivering sustainable transport policies seems to present particular difficulties to ministers across the UK and considers the UK's experience in an international perspective The book draws lessons from the last 10 years in order to better inform future policy development Traffic Jam is an indispensable analysis of the difficulties involved in turning policy ideals into practical reality and as such will be of interest to scholars students planners policy analysts and policy makers
