

CARDIOVASCULAR SYSTEM : ANATOMY & PHYSIOLOGY

FUNCTION OF CIRCULATION

Delivers O₂ , nutrients, hormones and antibodies to organs, tissues and cells
Removes the end product of cellular metabolism

FUNCTION OF THE HEART

Pumps oxygenated blood into the arterial system to supply capillaries and tissue
Pumps oxygen poor blood from the venous system through the lungs to be reoxygenated.

ANATOMY OF THE HEART

Cone shaped organ located in the mediastinal space.
The pericardial sac encases the heart and protects it, lubricates and holds 5-20 ml of pericardial fluid. This has two layers.

- the parietal pericardium which is the outer membrane
- the visceral pericardium is the inner membrane attached to the heart.

CONSISTS OF 3 LAYERS

- Epicardium : outermost layer of the heart
- Myocardium: middle layer of the heart, the contracting muscle
- Endocardium: innermost layer of the heart, lines the inner chambers and the valves.

4 CHAMBERS

- Right atrium: carries deoxygenated blood from the body via superior and inferior vena cava.
- Right ventricle: carries blood from the right atrium and pumps it into the lungs through the pulmonary artery
- Left atrium: carries oxygenated blood from the pulmonary veins
- Left ventricle: carries oxygenated blood from the left atrium and pumps it into the systemic circuit through the aorta.

4 VALVES

Two atrioventricular valves that close at the beginning of ventricular contraction. They prevent blood from flowing back into the atria.

- Tricuspid valve : on the right side of the heart
- Bicuspid valve: on the left side of the heart

Two semilunar valves that prevent blood from flowing back into the ventricles during relaxation

- Pulmonic semilunar valve: between the right ventricle and pulmonary artery
- Aortic semilunar valve: between the ventricle and the aorta.

CORONARY ARTERIES

- Right main coronary artery: supplies the right atrium and ventricle, the inferior left ventricle, posterior septal wall, SA and AV nodes.
- Left main coronary artery: consists of two main branches left anterior descending which supplies blood to the left ventricle and the ventricular septum and circumflex arteries which supply blood to the left atrium and the lateral/posterior aspects of the left ventricle.

BLOOD FLOW OF THE HEART

- From the superior and inferior vena cava oxygen poor blood goes to the
- Right atria through the tricuspid valve
- Right ventricle to the pulmonary valve
- To the pulmonary trunk and arteries into the lungs Co₂ is lost and O₂ is gained in the pulmonary capillaries
- O₂ rich blood enters the pulmonary veins to the left atrium
- Blood travels through the bicuspid valve and enters the left ventricle
- Blood moves through the aortic valve and travels through the aorta to the systemic circuit

Sectional Anatomy of the Heart

ELECTRICAL CONDUCTION

- SA node: pacemaker of the heart and initiates contraction at 80- 100 BPM.
- AV : receives impulses from the SA node initiates and sustains impulses at 40-60 BPM
- Bundle of His: continuation of the AV node and branches into the the bundle branches which terminate in the purkinje fibers
- Purkinje fibers: network of conducting strands beneath the ventricular endocardium. They can act as a pacemaker when the SA and AV fail as pace makers. They can sustain at 20-40 BPM

Cardiovascular System Study Guide The Blood

JoAnn Zerwekh

Cardiovascular System Study Guide The Blood:

Study Guide for Introduction to Human Anatomy and Physiology - E-Book - Revised Reprints Lois A Ball, 2016-11-15 **Study Guide for Introduction to Human Anatomy and Physiology** Lois A. Ball, 2015-10-13 Ball's Study Guide for Introduction to Human Anatomy and Physiology 4th Edition is a comprehensive learning tool designed to help you better understand the terminology and concepts presented in Solomon's text. Its Table of Contents mirrors that of the text's and its new matching exercises and jumble games fill in the blank study questions, labeling exercises, crossword puzzles, and more give you a fun way to test your mastery of the material. Updated with new content and art, this engaging Study Guide provides you with the tools you need to learn the language of anatomy and physiology. Labeling exercises consisting of art from the textbook reinforce understanding of where the structures of the body are located. Multiple choice end of chapter tests immediately let you know if you have mastered the content of that chapter and better prepare you for multiple choice quizzes and exams in class. Chapter outlines and learning objectives from the textbook highlight essential content and the objectives you should master before beginning the exercises. Crossword puzzle activities encourage the use of new vocabulary words and emphasize the proper spelling of terms. Fill in the blank exercises help you master and retain information in a fun and engaging way. Answers to exercises on Evolve so you can use this Study Guide to test your knowledge. NEW All new matching exercises and jumble games mixed with traditional fill in the blank questions create more variety and give you more options for study. NEW Updated content and art reflects changes made to the new edition of the text and provides you with the tools you need to learn and master the concepts presented in the text. **Student Notebook and Study Guide to Accompany The Human Body** Bruce Wingerd, Patty Bostwick Taylor, 2013-02-01 This Student Notebook and Study Guide the ideal companion to Bruce Wingerd's The Human Body reinvents the traditional study guide by giving students a tool to help grasp information in class and reinforce learning outside of class. Too often students struggle to both learn the concepts presented and simultaneously record crucial information. The Student Notebook and Study Guide provides a structure for recording in class material that parallels the text's concept presentation and includes supplemental questions and activities for assignment outside of the classroom. A complete answer guide for both the in class and out of class materials is available online. [Ssg- Human Biology 6E Student Study Guide](#) Chiras, 2008-02 Human Biology Sixth Edition provides students with a clear and concise introduction to the general concepts of mammalian biology and human structure and function. With its unique focus on health and homeostasis, Human Biology enhances students' understanding of their own health needs and presents the scientific background necessary for students to think critically about biological information they encounter in the media. The completely revised content and exceptional new art and photos provide students with a more user friendly text while excellent learning tools maximize comprehension of material. *Aehlert's EMT-basic Study Guide* Barbara Aehlert, 1998-01-01 The author a well known and

respected specialist in the field provides the reader with authoritative coverage of what the EMT needs to know perfectly balanced between the question bank and the more comprehensive traditional text The presentation is clear and concise making the text an excellent addition to the EMT student s resources as well as a perfect tool to use in reviewing for refresher courses
