Chemical Reaction Of Bleaching Hair:

Chemical and Physical Behavior of Human Hair Clarence R. Robbins, 2013-04-18 Nine years have elapsed since I wrote the first English edition of this book and progress in hair science has made a second edition necessary Since 1978 at least two new major scientific cosmetic journals have appeared and four International Hair Science Symposia and one International Symposium on Forensic Hair Comparisons have been held Thus continuing studies in hair science have been numerous in the past nine years so much so that a large proportion of the text had to be completely rewritten In addition a number of omissions that were kindly pointed out by reviewers have been included in this edition as well as corrections sent to me by readers I sincerely hope that this new edition fulfills the original purposes to provide a reasonably up to date and complete account of the chemical and physical properties and behavior of human hair and to serve as a convenient starting point for hair research and as indicated in the first edition not to be the final word

Chemistry of Natural Protein Fibers R. S. Asquith, 2012-12-06 This volume arose originally from the complaints of the editor's students both undergraduate and postgraduate that there was no modern book on protein fibers which told enough about protein science and chemical technologies related to fibers By and large this is probably a reasonable *cri de coeur* The undergraduate on a technological course lacking information on the basic scientific techniques used to carry out the research on which his fiber technology is based can find it difficult to obtain this information The pure science undergraduate often lacks knowledge of the application of these techniques in protein fiber technology The young graduates commencing research related to some aspect of protein fibers are drawn from a wide range of scientific disciplines having been trained as biochemists chemists physicists technologists and histologists to name but a few Generally these new research workers pass through a preliminary lost period in which they have to evaluate their background in relation to the wide and differing fields of research in protein fiber science to which they are now exposed As time goes on they then either develop a wide knowledge covering science and technology or remain in a specific part of their original discipline with a narrow knowledge of its application in the field of the research degree they are taking
