Palabras como coronavirus, inmunidad de reba o mutación, cepas virales, ARN, antígenos, anticuerpos o PCR son términos habituales en los medios de comunicación y en las conversaciones cotidianas por lo que desde la educación formal tenemos la obligación de además de formar en conocimiento científico desarrollar en los jóvenes la capacidad de análisis crítico de la información que les llega. Entendemos ahora más que nunca que la enseñanza de las ciencias debe ser contextualizada basada en la realidad que aborde controversias sociocientíficas que planteen problemas desde el punto de vista del individuo, de la comunidad o globales y que acerque no solo el conocimiento científico sino también la forma en cómo este se construye. Este libro ofrece a los docentes de las diferentes etapas educativas información básica para afrontar la enseñanza de los contenidos científicos relacionados con la pandemia así como los obstáculos que pueden encontrar en sus estudiantes y orientaciones e información sobre materiales y recursos que pueden usar y/o modificar para aplicar en sus aulas. Así el profesorado dispondrá de una guía para desarrollar alfabetización científica utilizando el contexto real de la COVID 19 en diferentes ámbitos científicos.
