Chemical Product Design Chemical Product Design:

Chemical Product Design E. L. Cussler, G. D. Moggridge, 2011-05-12 The chemical industry is changing going beyond commodity chemicals to a palette of higher value added products This groundbreaking book now revised and expanded documents this change and shows how to meet the challenges implied Presenting a four step design process needs ideas selection manufacture the authors supply readers with a simple design template that can be applied to a wide variety of products Four new chapters on commodities devices molecules drugs and microstructures show how this template can be applied to products including oxygen for emphysema patients pharmaceuticals like taxol dietary supplements like lutein and beverages which are more satisfying For different groups of products the authors supply both strategies for design and summaries of relevant science Economic analysis is expanded emphasizing the importance of speed to market selling ideas to investors and an expectation of limited time in the market Extra examples homework problems and a solutions manual are available

Chemical Product Design E. L. Cussler, G. D. Moggridge, 2001-04-16 Most chemical companies now devote new resources to the design and manufacture of specialty high value added chemical products such as pharmaceuticals cosmetics and electronic coatings The training of chemical engineers has remained static however emphasizing traditional commodities This ground breaking text redresses the balance between commodities and higher value added products It expands the scope of chemical engineering design to encompass both process design and product design The authors use a four step procedure for chemical product design needs ideas selection manufacture drawing numerous examples from industry to illustrate the discussion Chemical engineering students and beginning chemical engineers will find this text an inviting introduction to chemical product design

Chemical Product Formulation Design and Optimization Ali Elkamel, Hesham Alhumade, Navid Omidbakhsh, Keyvan Nowruzi, Thomas Duever, 2023-01-09 Chemical Product Formulation Design and Optimization Explore the cutting edge in chemical product formulation and design In Chemical Product Formulation Design and Optimization Methods Techniques and Case Studies a team of renowned technologists and engineers delivers a practice guide to chemical product design Offering real world case studies for disinfectant formulation the optimization of defined media and the formulation of biocomposites the book contains introduction to the current product design process In addition to the background of related statistical techniques readers will find Clear illustrations figures and tables that improve understanding and retention of critical topics Thorough introductions to the mathematical principles of chemical product design A complete examination of intellectual property considerations in the chemical product design process Ideal for process and chemical engineers Chemical Product Formulation Design and Optimization Methods Techniques and Case Studies is a must read resource for professionals in the pharmaceutical and cosmetics industry as well as chemical engineers working in the food paint and dye industries who seek a one stop resource that includes the latest advances in chemical product formulation

Chemical Product Design: Towards a Perspective through Case Studies Ka M. Ng, Rafiqul

Gani, Kim Dam-Johansen, 2006-10-24 *Chemical Product Design Towards a Perspective through Case Studies* provides a framework for chemical product design problems which are clearly defined together with different solution approaches. This book covers the latest methods and tools currently available in the field and discusses future challenges that the chemical industry is faced with. It focuses on important issues of chemical product design and provides a good overview on industrial chemical product design problems through case studies supplied by leading experts. The editors of *Chemical Product Design* teach chemical product design at graduate level courses and also serve as consultants for various chemical companies. They have also developed experimental techniques for chemical product design as well as computer aided design methods and tools. Highlights important issues of chemical product design through case studies. Case studies supplied by leading experts in chemical product design. Provides a complete framework for chemical product design. *Tools For Chemical Product Design*

Mariano Martín Martín, Mario R. Eden, Nishanth G. Chemmangattuvalappil, 2016-09-19 *Tools for Chemical Product Design From Consumer Products to Biomedicine* describes the challenges involved in systematic product design across a variety of industries and provides a comprehensive overview of mathematical tools aimed at the design of chemical products from molecular design to customer products. Chemical product design has become increasingly important over the past decade and includes a wide range of sectors including gasoline additives and blends in the petroleum industry, active ingredients and excipients in the pharmaceutical industry, and a variety of consumer products and specialty chemicals. Traditionally such products have been designed through trial and error methods which not only are time consuming but more importantly only provide limited knowledge that can be translated into next generation products. Features an impressive collection of contributions from leading researchers in the field. Presents the latest tools available across a variety of industries. Describes the challenges involved in systematic product design as well as the latest methods for solving such problems. Covers a wide range of sectors including gasoline additives and blends in the petroleum industry, active ingredients and excipients in the pharmaceutical industry, and a variety of consumer products and specialty chemicals. *Chemical Product Technology*

Dmitry Yu. Murzin, 2018-04-09 *Chemical Product Technology* focuses on materials chemistry and introduces industrial manufacturing technologies for different product types. The author presents a full cycle of product development for the materials that are used in everyday life such as cosmetics, dyes, drugs, papers, textiles, agrochemicals, etc. starting from product selection and up to setup of manufacturing process. **Proceedings of the 8th International Conference on Foundations of Computer-Aided Process Design**, 2014-07-14 This volume collects together the presentations at the Eighth International Conference on Foundations of Computer Aided Process Design (FOCAPD 2014), an event that brings together researchers, educators, and practitioners to identify new challenges and opportunities for process and product design. The chemical industry is currently entering a new phase of rapid evolution. The availability of low cost feedstocks from natural gas is causing renewed investment in basic chemicals in the OECD while societal pressures for sustainability and

energy security continue to be key drivers in technology development and product selection This dynamic environment creates opportunities to launch new products and processes and to demonstrate new methodologies for innovation synthesis and design FOCAPD 2014 fosters constructive interaction among thought leaders from academia industry and government and provides a showcase for the latest research in product and process design Focuses exclusively on the fundamentals and applications of computer aided design for the process industries Provides a fully archival and indexed record of the
