Colored White Transcending The Racial Past:

Colored White David R. Roediger, 2003-11 In this splendid book David Roediger shows the need for political activism aimed at transforming the social and political meaning of race No other writer on whiteness can match Roediger's historical breadth and depth his grasp of the formative role played by race in the making of the nineteenth century working class in defining the contours of twentieth century U S citizenship and social membership and in shaping the meaning of emerging social identities and cultural practices in the twenty first century George Lipsitz author of *The Possessive Investment in Whiteness* David Roediger has been showing us all for years how whiteness is a marked and not a neutral color in the history of the United States *Colored White* with its synthetic sweep and new historical investigations marks yet another advance In the burgeoning literature on whiteness this book stands out for its lucid unjargonridden lively prose its groundedness its analytic clarity and its scope Michael Rogin author of *Blackface White Noise* **New Working-Class Studies** John

Russo, Sherry Lee Linkon, 2018-08-06 We put the working class in all its varieties at the center of our work The new working class studies is not only about the labor movement or about workers of any particular kind or workers in any particular place even in the workplace Instead we ask questions about how class works for people at work at home and in the community We explore how class both unites and divides working class people which highlights the importance of understanding how class shapes and is shaped by race gender ethnicity and place We reflect on the common interests as well as the divisions between the most commonly imagined version of the working class industrial blue collar workers and workers in the new economy whose work and personal lives seem at first glance to place them solidly in the middle class from the Introduction In John Russo and Sherry Lee Linkon's book contributors trace the origins of the new working class studies explore how it is being developed both within and across fields and identify key themes and issues Historians economists geographers sociologists and scholars of literature and cultural studies introduce many and varied aspects of this emerging field Throughout they consider how the study of working class life transforms traditional disciplines and stress the importance of popular and artistic representations of working class life **How Race Is Made in America** Natalia Molina, 2014-01-01 How Race Is

Made in America examines Mexican Americans from 1924 when American law drastically reduced immigration into the United States to 1965 when many quotas were abolished to understand how broad themes of race and citizenship are constructed These years shaped the emergence of what Natalia Molina describes as an immigration regime which defined the racial categories that continue to influence perceptions in the United States about Mexican Americans race and ethnicity Molina demonstrates that despite the multiplicity of influences that help shape our concept of race common themes prevail Examining legal political social and cultural sources related to immigration she advances the theory that our understanding of race is socially constructed in relational ways that is in correspondence to other groups Molina introduces and explains her central theory racial scripts which highlights the ways in which the lives of racialized groups are linked across time and

space and thereby affect one another How Race Is Made in America also shows that these racial scripts are easily adopted and adapted to apply to different racial groups Grounding Global Justice Eric D. Larson, 2023-09-19 Globalization The rise of Trumpism has once again galvanized public debate about this highly charged term This book looks at the last time the concept spurred wide ranging and unruly agitation the late twentieth century In offering a transnational history of the explosive emergence of antiglobalization movements in the United States and Mexico it considers how farmers workers and Indigenous peoples struggled to change the direction of the world economy They did so by grounding their efforts to confront free market economic reforms in frontline struggles for economic and racial justice The story revolves around three popular organizations and their paths allow us to reinterpret some of the crucial moments messages and movements of the era including the Mexican roots of the idea of food sovereignty racism and whiteness at the momentous Battle of Seattle protests outside the 1999 World Trade Organization meetings and the rise of dramatic street demonstrations around the globe

More Courageous Conversations About Race Glenn E. Singleton, 2012-10-03 Use courageous conversations to build racial equity in your schools and districts In this companion to his best selling book Glenn Singleton presents specific examples in which racism impedes student success and illustrates how to usher in courageous conversations to ignite systemic transformation Through first person vignettes and an actual school district case study this breakthrough handbook focuses on the powerful possibilities that are unleashed when you Learn how other education leaders have addressed and improved race relations Explore urgent challenges in racial equity and courageous approaches to solving them Reflect on your personal role in the struggle to achieve racial equity Introduce culturally relevant curriculum instruction and assessment in your school or district

Racism in the Modern World Manfred Berg, Simon Wendt, 2011-04-01 Emphasizing the global nature of racism this volume brings together historians from various regional specializations to explore this phenomenon from comparative and transnational perspectives The essays shed light on how racial ideologies and practices developed changed and spread in Europe Asia the Near East Australia and Africa focusing on processes of transfer exchange appropriation and adaptation To what extent for example were racial beliefs of Western origin Did similar belief systems emerge in non Western societies independently of Western influence And how did these societies adopt and adapt Western racial beliefs once they were exposed to them Up to this point the few monographs or edited collections that exist only provide students of the history of racism with tentative answers to these questions More importantly the authors of these studies tend to ignore transnational processes of exchange and transfer Yet as this volume shows these are crucial to an understanding of the diffusion of racial belief systems around the globe The Baptist River William Glenn Jonas, 2008 This Baptist history

textbook highlights the diversity of the Baptist movement in North America as it has developed over the past few centuries Under the Baptist tent are such diverse groups as Primitive Baptists Freewill Baptists Seventh Day Baptists American Baptists Southern Baptists North American Baptists and Independent Baptists Each of these Baptists groups shares some

basic Baptist principles However there are significant theological and social differences between them This book is the ideal survey for undergraduate level students *Diaspora and Class Consciousness* Shanshan Lan,2012 This project adopts an interracial framework in studying the convergence and divergence of minority experiences in a highly racialized urban setting treating the Chinese immigrant experience as a pivot through which to examine the complex process of the multiracial transformation of white majority neighborhoods But it also goes beyond the hegemonic black white binary in studying race relations in the United States exploring the interconnectedness among different minority experiences and aiming to bridge the gap between a U S centered view of race and a transnational perspective generated by recent scholarship on migration and transnationalism Shades of Gray Molly Littlewood McKibbin,2018-12-01 2019 Choice Outstanding Academic Title In *Shades of Gray* Molly Littlewood McKibbin offers a social and literary history of multiracialism in the twentieth century United States She examines the African American and white racial binary in contemporary multiracial literature to reveal the tensions and struggles of multiracialism in American life through individual consciousness social perceptions societal expectations and subjective struggles with multiracial identity McKibbin weaves a rich sociohistorical tapestry around the critically acclaimed works of Danzy Senna *Caucasia* 1998 Rebecca Walker *Black White and Jewish Autobiography of a Shifting Self* 2001 Emily Raboteau *The Professor's Daughter* 2005 Rachel M Harper *Brass Ankle Blues* 2006 and Heidi Durrow *The Girl Who Fell from the Sky* 2010 Taking into account the social history of racial classification and the literary history of depicting mixed race she argues that these writers are producing new representations of multiracial identity *Shades of Gray* examines the current opportunity to define racial identity after the civil rights black power and multiracial movements of the late twentieth century changed the sociopolitical climate of the United States and helped revolutionize the racial consciousness of the nation McKibbin makes the case that twenty first century literature is able to represent multiracial identities for the first time in ways that do not adhere to the dichotomous conceptions of race that have until now determined how racial identities could be expressed in the United States The Souls of Mixed Folk Michele Elam,2011-02-21 *The Souls of Mixed Folk* examines representations of mixed race in literature and the arts that redefine new millennial aesthetics and politics Focusing on black white mixes Elam analyzes expressive works novels drama graphic narrative late night television art installations as artistic rejoinders to the perception that post Civil Rights politics are bereft and post Black art is apolitical Reorienting attention to the cultural invention of mixed race from the social sciences to the humanities Elam considers the creative work of Lezley Saar Aaron McGruder Nate Creekmore Danzy Senna Colson Whitehead Emily Raboteau Carl Hancock Rux and Dave Chappelle All these writers and artists address mixed race as both an aesthetic challenge and a social concern and together they gesture toward a poetics of social justice for the mulatto millennium *The Souls of Mixed Folk* seeks a middle way between competing hagiographic and apocalyptic impulses in mixed race scholarship between those who proselytize mixed race as the great hallelujah to the race problem and

those who can only hear the alarmist bells of civil rights destruction Both approaches can obscure some of the more critically astute engagements with new millennial iterations of mixed race by the multi generic cohort of contemporary writers artists and performers discussed in this book The Souls of Mixed Folk offers case studies of their creative work in an effort to expand the contemporary idiom about mixed race in the so called post race moment asking how might new millennial expressive forms suggest an aesthetics of mixed race And how might such an aesthetics productively reimagine the relations between race art and social equity in the twenty first century
