Calculated Risks How To Know When Numbers Deceive You

Patrick Malone

Calculated Risks How To Know When Numbers Deceive You:

Calculated Risks Gerd Gigerenzer, 2015-11-10 At the beginning of the twentieth century H G Wells predicted that statistical thinking would be as necessary for citizenship in a technological world as the ability to read and write But in the twenty first century we are often overwhelmed by a baffling array of percentages and probabilities as we try to navigate in a world dominated by statistics Cognitive scientist Gerd Gigerenzer says that because we haven't learned statistical thinking we don't understand risk and uncertainty In order to assess risk everything from the risk of an automobile accident to the certainty or uncertainty of some common medical screening tests we need a basic understanding of statistics Astonishingly doctors and lawyers don't understand risk any better than anyone else Gigerenzer reports a study in which doctors were told the results of breast cancer screenings and then were asked to explain the risks of contracting breast cancer to a woman who received a positive result from a screening The actual risk was small because the test gives many false positives But nearly every physician in the study overstated the risk Yet many people will have to make important health decisions based on such information and the interpretation of that information by their doctors Gigerenzer explains that a major obstacle to our understanding of numbers is that we live with an illusion of certainty Many of us believe that HIV tests DNA fingerprinting and the growing number of genetic tests are absolutely certain But even DNA evidence can produce spurious matches We cling to our illusion of certainty because the medical industry insurance companies investment advisers and election campaigns have become purveyors of certainty marketing it like a commodity To avoid confusion says Gigerenzer we should rely on more understandable representations of risk such as absolute risks For example it is said that a mammography screening reduces the risk of breast cancer by 25 percent But in absolute risks that means that out of every 1 000 women who do not participate in screening 4 will die while out of 1 000 women who do 3 will die A 25 percent risk reduction sounds much more significant than a benefit that 1 out of 1 000 women will reap This eye opening book explains how we can overcome our ignorance of numbers and better understand the risks we may be taking with our money our health and our lives

The Life You Save Patrick Malone, 2009-07-07 Millions of Americans suffer from indifferent outdated health care an estimated 40 000 incidents of medical harm happen every day The good news is that you can prevent this from happening to you or a family member Better yet you can find the very best care in the world Patrick Malone's sensible advice and real life anecdotes will inspire you to take charge of your own health care make the best choices and avoid serious harm With the Necessary Nine the essential steps to finding the best medical care The Life You Save offers vital information such as The single most important question you can ask your doctor When to know you have symptoms your doctor should not shrug off Checklists to help you get out of the hospital in one piece Where to locate the best surgeons and safest hospitals

Propaganda in the Helping Professions Eileen Gambrill, 2012-02-20 Propaganda in the helping professions has grown by leaps and bounds in recent decades with alarming implications for clients and their families as well as the professionals who try to help them There is a fog that has been generated by corporate interests and organizations attempting to sell their services and products to desperate or poorly educated consumers Propaganda in the Helping Professions is a guide to lifting the confusion From phrenology to institutional crib beds for adult psychiatric patients from Roman bird beak masks to drugs designed to combat overurination readers are taken on a tour across the centuries of egregious practices of professionals and quacks including the present day medicalization of our lives The author one of the field s most relentless critics of fads phonies and fallacies shows readers how to think critically about both research and advertising in order to deliver effective services to clients and not be bamboozled by bogus claims about alleged problems risks and remedies Incisive interesting eminently readable and passionately argued this book places responsibility for client well being both on consumers to raise questions and on the professionals who claim to help them to accurately answer them

Heuristics and the Law Gerd Gigerenzer, Christoph Engel, 2006-08-11 Experts in law psychology and economics explore the power of fast and frugal heuristics in the creation and implementation of law In recent decades the economists concept of rational choice has dominated legal reasoning And yet in practical terms neither the lawbreakers the law addresses nor officers of the law behave as the hyperrational beings postulated by rational choice Critics of rational choice and believers in fast and frugal heuristics propose another approach using certain formulations or general principles heuristics to help navigate in an environment that is not a well ordered setting with an occasional disturbance as described in the language of rational choice but instead is fundamentally uncertain or characterized by an unmanageable degree of complexity This is the intuition behind behavioral law and economics In Heuristics and the Law experts in law

psychology and economics explore the conceptual and practical power of the heuristics approach in law They discuss legal theory modeling and predicting the problems the law purports to solve the process of making law in the legislature or in the courtroom the application of existing law in the courts particularly regarding the law of evidence and implementation of the law and the impact of law on behavior Contributors Ronald J Allen Hal R Arkes Peter Ayton Susanne Baer Martin Beckenkamp Robert Cooter Leda Cosmides Mandeep K Dhami Robert C Ellickson Christoph Engel Richard A Epstein Wolfgang Fikentscher Axel Flessner Robert H Frank Bruno S Frey Gerd Gigerenzer Paul W Glimcher Daniel G Goldstein Chris Guthrie Jonathan Haidt Reid Hastie Ralph Hertwig Eric J Johnson Jonathan J Koehler Russell Korobkin Stephanie Kurzenh user Douglas A Kysar Donald C Langevoort Richard Lempert Stefan Magen Callia Piperides Jeffrey J Rachlinski Clara Sattler de Sousa e Brito Joachim Schulz Victoria A Shaffer Indra Spiecker genannt D hmann John Tooby Gerhard Wagner Elke U Weber Bernd Wittenbrink

Economics David A. Dieterle, 2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format As the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit This expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics Written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media Each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U S economy throughout history The extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world
