Francesca Abastante,Marta Bottero,Chiara D'Alpaos,Luisa Ingaramo,Alessandra Oppio,Paolo Rosato,Francesca Salvo,2022-09-20 This book examines the role of the evaluation models in decision making processes for the construction of circular cities in the digital revolution In particular the book explores the need for a rethinking of development models proposed by the circular economy which requires the valorization of natural social and economic capital Urban environment represents a crucial field of analysis in which applying the circular economy principles in order to steer a course towards a sustainable economy characterized by processes meant to create value instead of extracting it which put a step forward in the pathway towards a better future in terms of economic environmental and social effects and desirable outcomes In this context the design of urban regeneration processes and housing environments requires the adoption of inclusive analysis assessment models combined with the structuring and organization of public private investments that can contribute to creating positive natural and social impacts as well as economic and financial returns This fundamental paradigm shift is accentuated in the current context in which the digital revolution is reinventing the future and calls for a rethinking and reformulation of value systems in the era of technological process innovations while respecting economic natural and social ecosystems **Local Energy Communities** Gilles Debizet,Marta Pappalardo,Frédéric Wurtz,2022-09-06 This book draws

on social science analysis to understand the ongoing dynamics within and surrounding local energy communities in reliably electrified countries Belgium Canada Colombia France Germany India the Netherlands Spain Switzerland and the United Kingdom It offers a comprehensive overview of recent results and thus outlines a diversity of drivers and levers for scaling up energy communities or at least local energy sharing Analysing the main types of energy communities such as collective self consumption citizen cooperatives and peer to peer digital platforms the book does not only raise new questions for social scientists but also offers a comprehensive overview for all those contributing to the circular economy and the decentralization of energy production in inhabited areas where energy consumption is concentrated This book provides input for the ongoing debates in many European countries implementing the national law on the European directives for energy communities Furthermore without evading the antagonism between cooperative and market approaches or the contradictions between different issues the book outlines the innovative decision making tools that can facilitate the development of local energy production and sharing systems As well as being of interest to postgraduates and researchers in

the field of energy studies this book will be vital to energy professionals looking to support local energy communities decision making and design who wish to consider sociological organizational and territorial dimensions **The Routledge Research Companion to Energy Geographies** Stefan Bouzarovski, Martin J Pasqualetti, Vanesa Castán Broto, 2017-07-06 Energy has become a central concern of many strands of geographical inquiry from global climate change to the effects of energy decisions on our lives However many aspects of the black box of relationships at the energy society interface remain unopened especially in terms of the spatial underpinnings of energy production and consumption within nations cities and regions Debates focusing on the location and nature of energy flows frequently fail to consider the multiple geographical networks that illustrate and explain the distribution of fuels and services around the world Providing an integrated perspective on the complex interdependencies between energy and geography The Routledge Research Companion to Energy Geographies offers a timely conceptual framework to study the multiple facets of energy geography including security space and place planning environmental science economics and political science Illustrating how a geographic approach towards energy can aid decision making pathways in the domains of social justice and environment this book provides insights that will help move the international community toward greater cooperation stability and sustainability
