How Europeans View and Evaluate Democracy Mónica Ferrín, Hanspeter Kriesi, 2016-03-03 Based on a new data set covering 29 European and neighboring countries this volume shows how Europeans view and evaluate democracy what are their conceptions of democracy how do they assess the quality of democracy in their own country and to what extent do they consider their country's democracy as legitimate The study shows that Europeans share a common view of liberal democracy which is complemented by elements of social and direct democracy which go beyond the basic liberal model The level of their demands in terms of democracy varies however considerably across Europe and is related to their assessment of democracy the worse the quality of democracy in a given country the higher the respective demands on democracy The analysis of the determinants of democratic views and evaluations shows that they depend on the political and economic but less on the cultural context conditions Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European

Democracy and the Cartelization of Political Parties Richard S. Katz, Peter Mair, 2018-07-11 Political parties have long been recognized as essential institutions of democratic governance Both the organization of parties and their relationships with citizens the state and each other have evolved since the rise of liberal democracy in the 19th and early 20th centuries Going into the 21st century it appears that parties losing popular support putting both parties and potentially democracy in peril This book traces the evolution of parties from the model of the mass party through the catch all party model to argue that by the late 20th century the principal governing parties and their allied smaller parties collectively the political mainstream were effectively forming a cartel in which the form of competition might remain and indeed even appear to intensify while its substance was increasingly hollowed out The spoils of office were increasingly shared rather than restricted to the temporary winners contentious policy questions were kept off the political agenda and competition shifted from large questions of policy to minor questions of managerial competence To support this cartel the internal arrangements of parties changed to privilege the party in public office over the party on the ground The unintended consequence has been to stimulate the rise of extra cartel challengers to these cozy arrangements in the form of anti party system parties and populist oppositions on the left but especially on the right
