Class In Britain France And The Usa Since 193:

Land Reform and Working-Class Experience in Britain and the United States, 1800-1862 Jamie L.

Bronstein,1999 By exploring in detail land reform movements in Britain and the United States this book transcends traditional labor history and conceptions of class to deepen our understanding of the social political and economic history of both countries in the nineteenth century Although divided by their diverse experiences of industrialization and living in countries with different amounts of available land many working people in both Britain and the United States dreamed of free or inexpensive land to release them from the grim conditions of the 1840 s depressing overcrowded cities low wages or unemployment and stifling lives Focusing on the Chartist Land Company the Potters Joint Stock Emigration Society and the American National Reform movement this study analyses the ideas that motivated workers to turn to land reform the creation of working class land reform cultures and identities among both men and women and the international communication that enabled the formation of a transatlantic movement Though there were similarities in the ideas behind the land reform movements in their organizational strategies and in their relationships with other reform movements in the two countries the author s examination of their grassroots constituencies reveals key differences In the United States land reformers included small proprietors as well as artisans and factory workers In Britain by contrast at least a quarter of Chartist Land Company participants lived in cotton manufacturing towns strongholds of unpropertied workers and radical activity When the land reform movements came into contact with the organs of the press and government the differences in membership became crucial The Chartist Land Company was repressed by a government alarmed at the prospect of workers autonomy and the Potters Joint Stock Emigration Society died the natural death of straitened finances but the American land reform movement experienced some measure of success so much so that during the revolution in American political parties during the 1850 s land reform once a radical issue became a mainstream plank in the Republican platform

Service Clubs in American Society Jeffrey A. Charles,1993 Placing the clubs in the context of twentieth century middle class culture Charles maintains that they represented the response of locally oriented traditional middle class men to societal changes The groups emerged at a time when service was becoming both a middle class and a business ideal As voluntary associations they represented a shift in organizing rationale from fraternalism to service The clubs and their ideology of service were welcome as a unifying force at a time when small cities and towns were beset by economic and population pressures

A Class Book of English History Arthur Hassall,1912 *Statistical Register* ,1927 **The End of Class Politics?** Geoffrey Evans,1999-09-23 The last few decades has seen a prolonged debate over the nature and importance of social class as a basis for ideology class voting and class politics The prevailing assumption is that in western societies class inequalities are no longer important in determining political behaviour In *The End of Class Politics* leading scholars from the US UK and Europe argue that the evidence on which the assumptions about the decline importance of class is based is unfounded Instead the book argues that

the class basis of political competition has to some degree evolved but not declined Furthermore the social basis of political competition and sweeping claims about the new politics of postindustrial society need to be re examined Fighting the Great War at Sea Norman Friedman,2014-10-15 While the overriding image of the First World War is of the bloody stalemate on the Western Front the overall shape of the war arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in Germany s desperate attempts to counter the American industrial threat which ultimately drew the United States into the war This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing describes rapid wartime changes not only in ship and weapons technology but also in the way naval warfare was envisaged and fought Melding strategic technical and tactical aspects Friedman approaches the First World War from a fresh perspective and demonstrates how its perceived lessons dominated the way navies prepared for the Second World War **Congressional Record** United States. Congress,1928 **Reports, Minutes, Papers and Miscellaneous Documents** Great Britain. Dominions Royal Commission,1917 **Royal Commission on the Natural Resources, Trade, and Legislation of Certain Portions of His Majesty's Dominions** Great Britain. Dominions Royal Commission,1917 **Class, Ethnicity, and Social Inequality** Christopher McAll,1990 Eshleman s editing output tapes unpublished manuscripts ephemera criticism reviews pseudonyms library holdings of archival materials McAll sociology U of Montreal proposes that ethnicity is not a mask that conceals class nor an alternative to class as a basic explanatory concept but one of the ways in which social inequality expresses itself and ensures its own survival He discusses the role of class formation and ethnogenesis at different historical periods and in different social contexts and looks at both the idea of the nation state and the role of ethnicity in the context of colonialism Annotation copyrighted by Book News Inc Portland OR
