Dangerous Trade Histories Of Industrial Hazard Across A Globalizing World:

Dangerous Trade Christopher Sellers, Joseph Melling, 2011-12-22 From anthrax to asbestos to pesticides industrial toxins and pollutants have troubled the world for the past century and longer Environmental hazards from industry remain one of the world's foremost killers Dangerous Trade establishes historical groundwork for a better understanding of how and why these hazards continue to threaten our shrinking world In this timely collection an international group of scholars casts a rigorous eye towards efforts to combat these ailments Dangerous Trade contains a wide range of case studies that illuminate transnational movements of risk from the colonial plantations of Indonesia to compensation laws in late 19th century Britain and from the occupational medicine clinics of 1960s New York City to the burning of electronic waste in early twenty first century Uruguay The essays in Dangerous Trade provide an unprecedented broad perspective of the dangers stirred up by industrial activity across the globe as well as the voices raised to remedy them The Oxford Handbook of Environmental History Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field History of the Workplace Lars Bluma, Judith Rainhorn, 2016-04-14 Interest in the history of the workplace is on the rise Recent work in this area has combined traditional methods and theories of social history with new approaches and new questions It constitutes a topical contact zone a particularly dynamic field of research at the junction of social history history of occupational health and safety history of technology and the industrial environment This book focuses on the new approaches in this important and growing area and their possible range of influence These new attempts to rewrite a history of the workplace are multiple and in some cases disparate but share many key characteristics They are turning away from the assumption that class and class conflict is the prime mover in social history abandoning the traditional binomial workers vs entrepreneurs perspective which had long sustained the historical perspective on labour Moreover as this collection outlines these new attempts concentrate on the analysis of complex social networks of actors that defined and configured industrial workplaces suggesting a broadening of possible social actors This book was originally published as a special issue of the European Review of History **Bacteria in Britain, 1880-1939** Rosemary Wall, 2015-10-06 Focusing on the years between the identification of bacteria and the production of antibiotic medicine Wall presents a study into how bacteriology has affected both clinical practice and public knowledge The Oxford Handbook of Agricultural History Jeannie M. Wayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor **When**

the Air Became Important Janet Greenlees,2019-03-15 In *When the Air Became Important* medical historian Janet Greenlees examines the working environments of the heartlands of the British and American cotton textile industries from the nineteenth to the late twentieth centuries Greenlees contends that the air quality within these pioneering workplaces was a key contributor to the health of the wider communities of which they were a part Such enclosed environments where large numbers of people labored in close quarters were ideal settings for the rapid spread of diseases including tuberculosis bronchitis and pneumonia When workers left the factories for home these diseases were transmitted throughout the local population yet operatives also brought diseases into the factory Other aerial hazards common to both the community and workplace included poor ventilation and noise Emphasizing the importance of the peculiarities of place as well as employers balance of workers health against manufacturing needs Greenlees s pioneering book sheds light on the roots of contemporary environmentalism and occupational health reform Her work highlights the complicated relationships among local business local and national politics of health and community priorities [The Routledge Handbook of Environmental History](#) Emily O'Gorman,William San Martín,Mark Carey,Sandra Swart,2023-12-06 The Routledge Handbook of Environmental History presents a cutting edge overview of the dynamic and ever expanding field of environmental history It addresses recent transformations in the field and responses to shifting scholarly political and environmental landscapes The handbook fully and critically engages with recent exciting changes contextualizes them within longer term shifts in the field and charts potential new directions for study It focuses on five key areas Theories and concepts related to changing considerations of social justice including postcolonial antiracist and feminist approaches and the field s growing emphasis on multiple human voices and agencies The roles of non humans and the more than human in the telling of environmental histories from animals and plants to insects as vectors of disease and the influences of water and ice the changing theoretical approaches and the influence of concepts in related areas such as animal and discard studies How changes in theories and concepts are shaping methods in environmental history and shifting approaches to traditional sources like archives and oral histories as well as experiments by practitioners with new methods and sources Responses to a range of current complex problems such as climate change and how environmental historians can best help mitigate and resolve these problems Diverse ways in which environmental historians disseminate their research within and beyond academia including new modes of research dissemination teaching and engagements with stakeholders and the policy arena This is an important resource for environmental historians researchers and students in the related fields of political ecology environmental studies natural resources management and environmental planning Chapters 9 10 and 26 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Edges of Exposure** Noémi Tousignant,2018-04-19 In the industrialized nations of the global North well funded agencies like the CDC attend to citizens health monitoring and treating for toxic poisons like

lead How do the under resourced nations of the global South meet such challenges In *Edges of Exposure* No mi Tousignant traces the work of toxicologists in Senegal as they have sought to warn of and remediate the presence of heavy metals and other poisons in their communities Situating recent toxic scandals within histories of science and regulation in postcolonial Africa Tousignant shows how decolonization and structural adjustment have impacted toxicity and toxicology research Ultimately as Tousignant reveals scientists capacity to conduct research as determined by material working conditions levels of public investment and their creative but not always successful efforts to make visible the harm of toxic poisons affects their ability to keep equipment labs projects and careers going

A History of Environmentalism Marco Armiero, Lise Sedrez, 2014-07-31 Think globally act locally has become a call to environmentalist mobilization proposing a closer connection between global concerns local issues and individual responsibility *A History of Environmentalism* explores this dialectic relationship with ten contributors from a range of disciplines providing a history of environmentalism which frames global themes and narrates local stories Each of the chapters in this volume addresses specific struggles in the history of environmental movements for example over national parks species protection forests waste contamination nuclear energy and expropriation A diverse range of environments and environmental actors are covered including the communities in the Amazonian Forest the antelope in Tibet atomic power plants in Europe and oil and politics in the Niger Delta The chapters demonstrate how these conflicts make visible the intricate connections between local and global the body and the environment and power and nature *A History of Environmentalism* tells us much about transformations of cultural perceptions and ways of production and consuming as well as ecological and social changes More than offering an exhaustive picture of the entire environmentalist movement *A History of Environmentalism* highlights the importance of the experience of environmentalism within local communities It offers a worldwide and polyphonic perspective making it key reading for students and scholars of global and environmental history and political ecology

Hazardous Chemicals Ernst Homburg, Elisabeth Vaupel, 2019-08-01 Although poisonous substances have been a hazard for the whole of human history it is only with the development and large scale production of new chemical substances over the last two centuries that toxic manmade pollutants have become such a varied and widespread danger Covering a host of both notorious and little known chemicals the chapters in this collection investigate the emergence of specific toxic pathogenic carcinogenic and ecologically harmful chemicals as well as the scientific cultural and legislative responses they have prompted Each study situates chemical hazards in a long term and transnational framework and demonstrates the importance of considering both the natural and the social contexts in which their histories have unfolded
