

Danielson Framework for Teaching (2022) Rubrics by Washington State

Criterion 1: Centering instruction on high expectations for student achievement.			
2b: Fostering a Culture for Learning			
Unsatisfactory – 1	Basic – 2	Proficient – 3	Distinguished – 4
The culture of the class is not conducive to learning and does not support development.	The culture of the class is partially conducive to learning and development.	The culture of the class is characterized by high expectations and supports students' learning and development.	Students play an active role in establishing a culture that consistently fosters dialogue, reflection, and growth, allowing all students to experience success.
Critical Attributes: Purpose and Motivation			
There is little or no sense of purpose for the work or the reasons for doing it are external demands.	The teacher communicates the importance of content, the ultimate purpose of learning, and the value of personal growth with some success.	The teacher and students demonstrate a belief in the importance of learning and personal growth that motivates them to succeed and flourish.	The teacher and students display dedication to learning the content and a sense of purpose for their learning; both content mastery and personal growth are valued by the teacher and students.
Critical Attributes: Dispositions for Learning			
Student curiosity is ignored or discouraged; students are not asked to think critically or to reason and reflect.	Student curiosity, critical thinking, reasoning, and reflection are occasionally encouraged.	Curiosity, critical thinking, reasoning, and reflection are encouraged and intentionally developed.	Student curiosity, critical thinking, reasoning, and reflection are clearly evident in the classroom and have a direct impact on instruction, student learning, and development.
Critical Attributes: Student Agency and Pride in Work			
Students have little or no agency in learning experiences or classroom life.	Students are given some opportunities to exercise agency, that they may not be taken up or maybe infrequent.	Students have multiple opportunities to exercise agency, and autonomy is intentionally developed and celebrated.	Students clearly exercise autonomy in their learning and actively suggest ways to make the classroom more joyful, rigorous, and purposeful.
Critical Attributes: Support and Perseverance			
The teacher conveys that the work is too challenging for all or some of the students or that they lack the perseverance to succeed; students are allowed or expected to quit.	Confidence, resilience, persistence, and teamwork are encouraged, promoting a conviction that with hard work and perseverance all students can master the content.	Confidence, resilience, persistence, and teamwork that support student perseverance are intentionally developed and celebrated.	Students encourage one another to persevere and use strategies to support each other through challenging work.

The Instructional Leader's Guide to Implementing K-8 Science Practices Rebecca Lowenhaupt, Katherine L. McNeill, Rebecca Katsh-Singer, Benjamin R. Lowell, Kevin Cherbow, 2021-10-25 An accessible engaging primer on the eight science practices at the heart of the Next Generation Science Standards NGSS providing K 8 instructional leaders with the grounding they need to ensure excellent science instruction in every classroom The NGSS reconceptualize science instruction by redefining the teacher as someone who helps students construct their own knowledge by thinking like scientists and engaging in discrete science practices However with STEM teachers in short supply and generalists often feeling underprepared to teach elementary and middle school science what can instructional leaders do to ensure students get a strong start in this critical area and learn to love science Although a content neutral approach to supervision one that emphasizes general pedagogical features such as student engagement cognitive load or classroom management is undoubtedly beneficial the best instructional leaders know that content specific approaches are necessary to achieve real excellence We therefore need to go deeper if we want to engage both teachers and students with the science practices We need science specific supervision With that in mind the authors provide vignettes and examples of the science practices in use advice on observing science classrooms concrete look fors and guidance on fostering ongoing teacher learning They also offer a rich compendium of research and evidence based resources including sample lessons FAQs and more than a dozen downloadable tools to facilitate classroom observation feedback sessions and professional development This is an essential guide for any K 8 instructional leader who wants to empower all teachers to provide all students with rich science experiences and develop the cognitive and noncognitive skills students will need to thrive in more advanced courses work and society

A Guide to Impactful Teacher Evaluations Joseph O. Rodgers, 2021-03-10 What if everything we thought we knew about effective teacher evaluations was wrong A Guide to Impactful Teacher Evaluations walks educators through an important shift in thinking about how to evaluate teachers from systems focused on individuals and results to solutions focused on collectives and processes Disregarding older ineffective models that rely on faulty assumptions this book embraces new approaches for measuring teacher competency that achieve valid assessment of effective teaching teacher professional growth and student learning Chapters explore teacher evaluation systems based on professional learning community principles confront the current system of teacher evaluation that has led to frustration criticism and disrespect provide strategies for delivering new skills and supporting teachers growth and include Tips and Talking Points for schools and districts Outlining best practice and sharing actionable tools grounded in collaboration and teamwork this book helps K 12 school leaders explore teacher evaluation that has a real and lasting impact on the profession and student learning

Rubric Nation Michelle Tenam-Zemach, Joseph E. Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation When did rubrics become ubiquitous in the field of education What impact do rubrics have

on students teachers teacher educators and the educational enterprise This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education evaluation and education more broadly Rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country Although there is a wealth of literature about how to make rubrics there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education Since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool This book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion Rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature
