The Robot Factory Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students

Video in Teacher Learning Laura Baecher, 2019-06-12 Harness the power of video to promote reflective practice and teacher growth Video is the only feedback method that allows educators to view their teaching through their own eyes yet many K 12 professionals have yet to reap the benefits of this powerful technology This practical and comprehensive guide takes advantage of new methods and tools to capture teaching and learning and a broad base of current research to impact teacher thinking and actions Written for instructional coaches administrators supervisors and individual teachers it includes guidance on how to get started and how to engage in nonjudgmental and descriptive analysis scaffolding to counter anxiety and resistance and to cultivate a growth mindset chapters on specific contexts including developmental evaluative and problems of practice guidance for observation in specific grade bands and for specific student populations templates and links to videos for video analysis tasks step by step process outlines real world vignettes and application questions Drawing on broad evidence of the impact of video on teaching this is the guide for maximizing this powerful form of professional learning
