Timothy W. Kneeland

Dark Sun The Making Of The Hydrogen Bomb:

Dark Sun Richard Rhodes,1995 Here for the first time in a brilliant panoramic portrait by the Pulitzer Prize winning author of The Making of the Atomic Bomb is the definitive often shocking story of the politics and the science behind the development of the hydrogen bomb and the birth of the Cold War Based on secret files in the United States and the former Soviet Union this monumental work of history discloses how and why the United States decided to create the bomb that would dominate world politics for more than forty years **Dark Sun** Richard Lee Rhodes,1996-09 **A Nuclear Winter's**

Tale Lawrence Badash,2009-07-10 The rise and fall of the concept of nuclear winter played out in research activity public relations and Reagan era politics The nuclear winter phenomenon burst upon the public s consciousness in 1983 Added to the horror of a nuclear war s immediate effects was the fear that the smoke from fires ignited by the explosions would block the sun creating an extended winter that might kill more people worldwide than the initial nuclear strikes In A Nuclear Winter s Tale Lawrence Badash maps the rise and fall of the science of nuclear winter examining research activity the popularization of the concept and the Reagan era politics that combined to influence policy and public opinion Badash traces the several sciences including studies of volcanic eruptions ozone depletion and dinosaur extinction that merged to allow computer modeling of nuclear winter and its development as a scientific specialty He places this in the political context of the Reagan years discussing congressional interest media attention the administration s plans for a research program and the Defense Department s claims that the arms buildup underway would prevent nuclear war and thus nuclear winter A Nuclear Winter s Tale tells an important story but also provides a useful illustration of the complex relationship between science and society It examines the behavior of scientists in the public arena and in the scientific community and raises questions about the problems faced by scientific Cassandras the implications when scientists go public with worst case scenarios and the timing of government reaction to startling scientific findings **Bombing the Marshall Islands** Keith M. Parsons,Robert

A. Zaballa,2017-07-26 A narrative history of the nuclear tests conducted by the United States in the Marshall Islands from 1946 to 1958 **North River Depot** John Garbinski,2007-02-16 The dawn of the Nuclear Age The birth of the Cold War

These events are hauntingly portrayed in North River Depot An historical novel about the United States First Operational Nuclear Weapons Stockpile Storage Site This novel tells the story of the Silent Peacekeepers Men sworn to secrecy during the most dangerous period in the History of the United States North River Depot is a must read for anyone interested in the history of Nuclear Weapons and the Cold War This book was originally published in 2005 In 2007 a second edition was published with minor changes This third and final edition 2011 has been completely revised with the addition of several new photographs **Surprise Attack** Larry Hancock,2016-09-13 Surprise Attack explores sixty plus years of military and terror

threats against the United States It examines the intelligence tools and practices that provided warnings of those attacks and evaluates the United States responses both in preparedness and most importantly the effectiveness of our military and

national command authority Contrary to common claims the historical record now shows that warnings often very solid warnings have preceded almost all such attacks both domestic and international Intelligence practices developed early in the Cold War along with intelligence collection techniques have consistently produced accurate warnings for our national security decision makers Surprise Attack traces the evolution and application of those practices and explores why such warnings have often failed to either interdict or intercept actual attacks Going beyond warnings Surprise Attack explores the real world performance of the nation s military and civilian command and control history exposing disconnects in the chain of command failures of command and control and fundamental performance issues with national command authority America has faced an ongoing series of threats from the attacks on Hawaii and the Philippines in 1941 through the crises and confrontations of the Cold War global attacks on American personnel and facilities to the contemporary violence of jihadi terrorism With a detailed study of those threats the attacks related to them and America s response a picture of what works and what doesn t emerges The attacks have been tragic and we see the defensive preparations and response often ineffective Yet lessons can be learned from the experience Surprise Attack represents a comprehensive effort to identify and document those lessons

Fearing the Worst Samuel F. Wells Jr.,2019-11-26 After World War II the escalating tensions of the Cold War shaped the international system Fearing the Worst explains how the Korean War fundamentally changed postwar competition between the United States and the Soviet Union into a militarized confrontation that would last decades Samuel F Wells Jr examines how military and political events interacted to escalate the conflict Decisions made by the Truman administration in the first six months of the Korean War drove both superpowers to intensify their defense buildup American leaders feared the worst case scenario that Stalin was prepared to start World War III and raced to build up strategic arms resulting in a struggle they did not seek out or intend Their decisions stemmed from incomplete interpretations of Soviet and Chinese goals especially the belief that China was a Kremlin puppet Yet Stalin Mao and Kim Il sung all had their own agendas about which the United States lacked reliable intelligence Drawing on newly available documents and memoirs including previously restricted archives in Russia China and North Korea Wells analyzes the key decision points that changed the course of the war He also provides vivid profiles of the central actors as well as important but lesser known figures Bringing together studies of military policy and diplomacy with the roles of technology intelligence and domestic politics in each of the principal nations Fearing the Worst offers a new account of the Korean War and its lasting legacy

Nuclear Weapons and the Environment John Perry,2021-03-12 In Nuclear Weapons and the Environment John Perry highlights the environmental damage caused by nuclear device testing The failure of the Nuclear Proliferation Treaty and the continued proliferation of nuclear weapons is a grave risk to not only human life but to the environment Pointing to the unstable political situation between a variety of state and non state actors the remediation of nuclear test sites and the risks involved in the production of nuclear weapons Perry makes a clear case for the dire importance of non proliferation The Routledge

History of American Science Timothy W. Kneeland, 2022-12-01 The Routledge History of American Science provides an essential companion to the most significant themes within the subject area. The field of the history of science continues to grow and expand into new areas and to adopt new theories to explain the role of science and its connections to politics, economics, religion, social structures, intellectual history, and art. This book takes North America as its focus and explores the history of science in the region both nationally and internationally with 27 chapters from a range of disciplines. Part I takes a chronological look at the history of science in America from its origins in the Atlantic World through to the American Revolution, the Civil War, the World Wars, and ending in the postmodern era. Part II discusses American science in practice from scientists as practitioners, laboratories, and field experiences to science and religion. Part III examines the relationship between science and power. The chapters touch on the intersection of science and imperialism, environmental science in U.S. politics, as well as capitalism and science. Finally, Part IV explores how science is embedded in the culture of the United States with topics such as the growing importance of climate science, the role of scientific racism, the construction of gender, and how science and disability studies converge. The final chapter reviews the way in which society has embraced or rejected science with reflections on the recent pandemic and what it may mean for the future of American science. This book fills a much needed gap in the history and historiography of American science studies and will be an invaluable guide for any student or researcher in the history of science in America.

Seizing the Light Robert Hirsch, 2017-04-07 The definitive history of photography book *Seizing the Light: A Social Aesthetic History of Photography* delivers the fascinating story of how photography as an art form came into being and its continued development, maturity, and transformation. Covering the major events, practitioners' works, and social effects of photographic practice, Robert Hirsch provides a concise and discerning chronological account of Western photography. This fundamental starting place shows the diversity of makers, inventors, issues, and applications, exploring the artistic, critical, and social aspects of the creative process. The third edition includes up-to-date information about contemporary photographers like Cindy Sherman and Yang Yongliang and comprehensive coverage of the digital revolution, including the rise of mobile photography, the citizen as journalist, and the role of social media. Highly illustrated with full-color images and contributions from hundreds of artists around the world, *Seizing the Light* serves as a gateway to the history of photography. Written in an accessible style, it is perfect for students newly engaging with the practice of photography and for experienced photographers wanting to contextualize their own work.
