Darkness Before Dawn Redefining The Journey Through Depression:

Darkness Before Dawn Various Various Authors, 2015-04-01 There is no shortage of psychology self help books on depression but this collection envisioned and edited by Sounds True founder Tami Simon is not one of them You won't be revisiting familiar therapies or antidepressant options What you will find is a gathering of 16 exceptional and compassionate teachers who have faced profound depression themselves Their purpose To radically shift the way that we perceive the experience To offer insights and practices that reach beyond conventional models And to help us receive depression's uninvited yet singular gifts The guidance presented here supports traditional psychotherapy and medication as valuable tools But for those who've found these approaches incomplete or seek to help others at an impasse there's much to discover within these pages including Thomas Moore PhD on Saturn's gifts Sally Kempton on shifting from suffering and into witnessing awareness poet Mark Nepo on embracing both emptiness and aliveness Mary Pipher PhD on how despair can open us to long hidden joy Christina Baldwin on ineffable sorrow Parker J Palmer PhD on finding meaning and connection through the experience of depression plus exceptional contributions by Ann Marie Chiasson MD James Gordon MD Sandra Ingerman Karla McLaren Robert Augustus Masters PhD Amy Weintraub Jeff Foster Elizabeth Rabia Roberts EdD Michael Bernard Beckwith and Reginald A Ray PhD

Depression Barbara Dowds, 2021-04-19 This book attempts to do justice to the depth and complexity of depression as to its causes and its treatment in psychotherapy It challenges the reductive medical view of depression as a serotonin deficiency resulting in a collection of undesirable symptoms to be dispatched with antidepressants or CBT exercises Rather it locates the origins of depression in childhood adversity primarily caused by unattuned cold critical hostile or abusive caregiving Insecure attachment interacts with other elements of a stressful life history as well as with genetic makeup to pave the way for depression Such a childhood has long term impacts on the setting of the stress and threat responses of the nervous system Depression fundamentally indicates a weak and non resilient sense of self coupled with limited capacities for trust and either autonomy or intimacy in relationships These are the issues that must be tackled in psychotherapy Since depression carries a message for the sufferer it must be investigated for its meaning Why has the individual withdrawn from life and what are they being asked to change in how they live and relate Before this reparative and creative phase of therapy can begin however we must remember that depression is not just low mood but also stuck mood Rigid beliefs and processes that block therapeutic engagement can be gently questioned by helping the client see that they are held by only one part of the self whereas other for growth parts carry hope and a willingness to play and explore Overall it is crucial in working with depression to see and to relate to the client as a whole person not simply a bundle of cognitive shortcomings to be corrected but as an emotional organismic relational existential and spiritual being Depression An Introduction presents a biopsychosocial model combining developmental and attachment perspectives with genetics and neurobiology Its therapeutic orientation is humanistic and integrative but has much to offer anyone wanting to know more

about this widely known but little understood condition *Depression and the Erosion of the Self in Late Modernity* Barbara Dowds,2018-04-19 Depression is not a disease of the brain a genetic disability or even a mood disorder Rather shutdown numbness or sadness are non pathological adaptations to adverse childhood and adult environments This challenging book thus understands depression as a wise response to an unliveable situation It can teach us what is wrong with our lives and what we must learn in order to go beyond symptom relief and reconnect to our most fundamental needs relational existential and spiritual Because moods shape how we engage with our outer and inner worlds they underlie all human behaviour If the sociocultural world is toxic or frustrates our core needs we will withdraw to protect ourselves Those who have encountered a non facilitating environment in childhood will be even more sensitive to adult stresses since their self organisation is fragile and non resilient As depression is so complex understanding it demands an integrative approach **Philosophy of**

Suffering David Bain,Michael Brady,Jennifer Corns,2019-10-02 Suffering is a central component of our lives We suffer pain We fall ill We fail and are failed Our loved ones die It is a commonplace to think that suffering is always and everywhere bad But might suffering also be good If so in what ways might suffering have positive as well as negative value This important volume examines these questions and is the first comprehensive examination of suffering from a philosophical perspective An outstanding roster of international contributors explore the nature of suffering pain and valence as well as the value of suffering and the relationships between suffering morality and rationality Philosophy of Suffering Metaphysics Value and Normativity is essential reading for students and researchers in philosophy of mind philosophy of psychology cognitive and behavioral psychology as well as those in health and medicine researching conceptual issues regarding suffering and pain
