**Sartorial Fandom** Elizabeth Affuso, Suzanne Scott, 2023-04-03 In recent years geeks have become chic and the fashion and beauty industries have responded to this trend with a plethora of fashion forward merchandise aimed at the increasingly lucrative fan demographic This mainstreaming of fan identity is reflected in the glut of pop culture T shirts lining the aisles of big box retailers as well as the proliferation of fan focused lifestyle brands and digital retailers over the past decade While fashion and beauty have long been integrated into the media industry with tie in lines franchise products and other forms of merchandise there has been limited study of fans relationship to these items and industries Sartorial Fandom shines a spotlight on the fashion and beauty cultures that undergird fandoms considering the retailers branded products and fan made objects that serve as forms of identity expression This collection is invested in the subcultural and mainstream expression of style and in the spaces where the two intersect Fan culture is in many respects an optimal space to situate a study of style because fandom itself is often situated between the subcultural and the mainstream Collectively the chapters in this anthology explore how various axes of lived identity interact with a growing movement to consider fandom as a lifestyle category ultimately contending that sartorial practices are central to fan expression but also indicative of the primacy of fandom in contemporary taste cultures

***The Osteology of Infants and Children*** Brenda J. Baker, Tosha L. Dupras, Matthew W. Tocheri, 2005-07-27 Most archaeologists and bioarchaeologists receive little or no training in the recognition of skeletal remains of fetuses infants and children Yet many research sites may contain such materials Without a framework for identifying the bones or the excavation techniques suited to their recovery archaeologists may often overlook subadult skeletal remains or even confuse them with animal bones The Osteology of Infants and Children fills the need for a field and lab manual on this important topic and provides a supplemental textbook for human osteology courses Focusing on juvenile skeletons their recovery and identification and siding in both field and lab settings the volume provides basic descriptions and careful illustrations of each skeletal element at varying stages of development along with sections on differentiation from other bones and siding tips The book offers detailed treatment of the skull and teeth including the cranial vault and facial bones and examines the infracranial skeleton vertebrae pelvis chest shoulders arms hands legs and feet A quick reference guide explains age estimation and identification templates The illustrations are enhanced by photographs from two recent archaeology projects in Egypt at Abydos and Dakhleh Oasis The extensive collection of fetal and child remains from these sites provides new reference material unavailable in previous publications making this manual an unparalleled resource in the field of physical anthropology
