Dark Pools Scott Patterson:

Dark Pools Scott Patterson, 2013-06-25 A news breaking account of the global stock market's subterranean battles Dark Pools portrays the rise of the bots artificially intelligent systems that execute trades in milliseconds and use the cover of darkness to out maneuver the humans who've created them In the beginning was Josh Levine an idealistic programming genius who dreamed of wresting control of the market from the big exchanges that again and again gave the giant institutions an advantage over the little guy Levine created a computerized trading hub named Island where small traders swapped stocks and over time his invention morphed into a global electronic stock market that sent trillions in capital through a vast jungle of fiber optic cables By then the market that Levine had sought to fix had turned upside down birthing secretive exchanges called dark pools and a new species of trading machines that could think and that seemed ominously to be slipping the control of their human masters Dark Pools is the fascinating story of how global markets have been hijacked by trading robots many so self directed that humans can't predict what they'll do next

Dark Pools Scott Patterson, 2012 Evaluates the cost and consequences of high speed trading arguing that the development of automatic super intelligent trading machines is eliminating necessary human interests and compromising regulation measures

Vicious Circuits Joseph Jonghyun Jeon, 2019-03-12 In December of 1997 the International Monetary Fund announced the largest bailout package in its history aimed at stabilizing the South Korean economy in response to a credit and currency crisis of the same year Vicious Circuits examines what it terms Korea's IMF Cinema the decade of cinema following that crisis in order to think through the transformations of global political economy at the end of the American century It argues that one of the most dominant traits of the cinema that emerged after the worst economic crisis in the history of South Korea was its preoccupation with economic phenomena As the quintessentially corporate art form made as much in the boardroom as in the studio film in this context became an ideal site for thinking through the global political economy in the transitional moment of American decline and Chinese ascension With an explicit focus of state economic policy IMF cinema did not just depict the economy it also was this economy's material embodiment That is it both represented economic developments and was itself an important sector in which the same pressures and changes affecting the economy at large were at work Joseph Jonghyun Jeon's window on Korea provides a peripheral but crucial perspective on the operations of late US hegemony and the contradictions that ultimately corrode it

L'impensato N. Katherine Hayles, 2022-02-09 Pensare senza pensare intorno a quest'idea che N. Katherine Hayles che da anni insegna e scrive intorno alle relazioni tra letteratura, scienza e tecnologia costruisce questo saggio. Si indaga tra le pagine su come usiamo processi cognitivi inaccessibili alla coscienza eppure necessari al suo funzionamento e nell'affiancare le discipline scientifiche a quelle umanistiche si estende la nostra idea della cognizione dimostrando come questa vada ben oltre il semplice concetto di coscienza. La cognizione per Hayles applicabile non solo ai processi inconsci degli esseri umani ma anche a tutte le altre forme di vita inclusi organismi unicellulari e piante estendendo il campo anche ai sistemi tecnici e tecnologici come semafori o droni o perfino algoritmi che nell'interagire con gli umani formano assemblaggi cognitivi sistemi di relazione che stanno radicalmente trasformando la vita sulla Terra per come finora l'abbiamo conosciuta. Tutto ci conduce l'autrice a parlare di ecologia cognitiva planetaria e a comporre domande urgenti tanto per le scienze umane quanto per le scienze dure.
