Darwin S Enigma Darwin S Enigma:

Darwin's Enigma Luther Sunderland, 1998-08-01 Evolutionists have long known that Charles Darwin's original argument against his own theory that a lack of fossil evidence of transitional forms would reduce him to an embarrassing footnote in history was screamingly true. No legitimate fossil evidence exists that shows one species changing into another. This startling realization led Luther Sunderland to an exhaustive search of the subject and his findings show clearly that evolution is a theory in disarray. From his own interviews with leading evolutionists and an examination of the fossil evidence, Sunderland shows that the Enigma of Darwin's anti-God philosophy is that the facts show it is anything but rock solid. Before his death in 1987, Luther Sunderland had garnered the respect of creationists worldwide for his investigative writing of the evolution controversy. After obtaining an engineering degree from Penn State University, Sunderland spent 30 years developing automatic flight control systems for the General Electric Company. **DARWIN S ENIGMA** remains an intensely popular work on the theory of origins.

Darwin's Enigma Fred Harding, 2017-01-18 Alfred Wallace, the co-discoverer of Natural Selection, wrote: "Man's Naked Skin could not have been produced by Natural Selection. It seems to me then to be absolutely certain that Natural Selection could not have produced man's hairless body by the accumulation of variations from a hairy ancestor. The evidence all goes to show that such variations could not have been useful but must on the contrary have been to some extent hurtful." Darwin and Wallace argued about the issue of human hairlessness for a number of years, but in the end, Darwin conceded that Wallace had been right. Darwin wrote in his book *The Descent of Man*, published in 1871, an acknowledgement to Wallace's arguments: "The loss of hair is an inconvenience and probably an injury to man even in a hot climate for he is thus exposed to the scorching of the sun and to sudden chills especially during wet weather. As Mr Wallace remarks, the natives in all countries are glad to protect their naked backs and shoulders with some slight covering. No one supposes that the nakedness of the skin is any direct advantage to man; his body therefore cannot have been divested of hair through natural selection. Nor as shown in a former chapter have we any evidence that this can be due to the direct action of climate or that it is the result of correlated development." This issue of human hairlessness was to become a riddle that Darwin would never resolve. It is true that he did submit another theory which he called sexual selection, which he believed resolved the problem, but the theory was not accepted in his day as a solution and it has since been discredited as a result of a series of rigorous science tests in recent years. No other evolutionist since has been able to resolve Darwin's Enigma, although it has not been for the want of trying. It is the objective of this book to take an honest look at all the theories proposed by Darwin and those who followed him to see if there is indeed a solution through a naturalist mechanism that could account for the anomaly of man's almost hairless condition. But if there is no solution that can be found, then we will have to face one unavoidable conclusion: Man did not evolve from a hairy ape-like ancestor as is claimed by evolutionists, but had in fact been created naked and hairless through the activities of Intelligent agency. Isn't that what the book of Genesis
