Darwin's Ghosts The Secret History Of Evolution:

Darwin's Ghosts Rebecca Stott, 2012-06-12 A NEW YORK TIMES NOTABLE BOOK An extraordinarily wide ranging and engaging book about the men who shaped the work of Charles Darwin a book that enriches our understanding of how the struggle to think new thoughts is shared across time and space and people The Sunday Telegraph London Christmas 1859 Just one month after the publication of *On the Origin of Species* Charles Darwin received an unsettling letter He had expected criticism in fact letters were arriving daily most expressing outrage and accusations of heresy But this letter was different It accused him of failing to acknowledge his predecessors of taking credit for a theory that had already been discovered by others Darwin realized that he had made an error in omitting from *Origin of Species* any mention of his intellectual forebears Yet when he tried to trace all of the natural philosophers who had laid the groundwork for his theory he found that history had already forgotten many of them Darwin's *Ghosts* tells the story of the collective discovery of evolution from Aristotle walking the shores of Lesbos with his pupils to Al Jahiz an Arab writer in the first century from Leonardo da Vinci searching for fossils in the mine shafts of the Tuscan hills to Denis Diderot in Paris exploring the origins of species while under the surveillance of the secret police and the brilliant naturalists of the Jardin de Plantes finding evidence for evolutionary change in the natural history collections stolen during the Napoleonic wars Evolution was not discovered single handedly Rebecca Stott argues contrary to what has become standard lore but is an idea that emerged over many centuries advanced by daring individuals across the globe who had the imagination to speculate on nature's extraordinary ways and who had the courage to articulate such speculations at a time when to do so was often considered heresy With each chapter focusing on an early evolutionary thinker Darwin's *Ghosts* is a fascinating account of a diverse group of individuals who despite the very real dangers of challenging a system in which everything was presumed to have been created perfectly by God felt compelled to understand where we came from Ultimately Stott demonstrates ideas including evolution itself evolve just as animals and plants do by intermingling toppling weaker notions and developing over stretches of time Darwin's *Ghosts* presents a groundbreaking new theory of an idea that has changed our very understanding of who we are Praise for Darwin's *Ghosts* Absorbing Stott captures the breathless excitement of an investigation on the cusp of the unknown A lively original book The New York Times Book Review Stott's research is broad and unerring her book is wonderful An exhilarating romp through 2 000 years of fascinating scientific history Nature Stott brings Darwin himself to life She writes with a novelist's flair Darwin and the ghosts so richly described in Ms Stott's enjoyable book are the descendants of Aristotle and Bacon and the ancestors of today's scientists The Wall Street Journal Riveting Stott has done a wonderful job in showing just how many extraordinary people had speculated on where we came from before the great theorist dispelled all doubts The Guardian U K **Darwin's Ghosts** Rebecca Stott, 2013 [Darwin's "Historical Sketch"](#) Curtis N. Johnson, 2020 Curtis Johnson examines Charles Darwin's *Historical Sketch* creating profiles of the great thinkers writing before and during

Darwin's lifetime **The Art of Insubordination** Todd B. Kashdan, 2022-02-15 A highly practical and researched based toolbox for anyone who wants to create a world with more justice creativity and courage For too long the term insubordination has evoked negative feelings and mental images But for ideas to evolve and societies to progress it's vital to cultivate rebels who are committed to challenging conventional wisdom and improving on it Change never comes easily And most would be rebels lack the skills to overcome hostile audiences who cling desperately to the way things are Based on cutting edge research The Art of Insubordination is the essential guide for anyone seeking to be heard make change and rebel against an unhealthy status quo Learn how to Resist the allure of complacency Discover the value of being around people who stop conforming and start deviating Produce messages that influence the majority when in the minority Build mighty alliances Manage the discomfort when trying to rebel Champion ideas that run counter to traditional thinking Unlock the benefits of being in a group of diverse people holding divergent views Cultivate curiosity courage and independent critical thinking in youth Filled with engaging stories about dissenters in the trenches as well as science that will transform your thinking The Art of Insubordination is for anyone who seeks more justice courage and creativity in the world

Milestones in the Evolving Theory of Evolution David Wool, 2020-11-18 The book illustrates how Darwin's theory has evolved about the development of the biological world before Darwin and great changes that took place with the incorporation of statistics and after Darwin's death of genetics and mathematics The formation of Modern Synthesis protein electrophoresis Discovery of DNA opened new avenues for the study of evolution Life's Edge Carl Zimmer, 2021-03-09 FINALIST FOR THE PEN E O WILSON LITERARY SCIENCE WRITING AWARD A NEW YORK TIMES NOTABLE BOOK OF 2021 A SCIENCE NEWS FAVORITE BOOK OF 2021 A SMITHSONIAN TOP TEN SCIENCE BOOK OF 2021 Stories that both dazzle and edify This book is not just about life but about discovery itself Siddhartha Mukherjee New York Times Book Review We all assume we know what life is but the more scientists learn about the living world from protocells to brains from zygotes to pandemic viruses the harder they find it is to locate life's edge Carl Zimmer investigates one of the biggest questions of all What is life The answer seems obvious until you try to seriously answer it Is the apple sitting on your kitchen counter alive or is only the apple tree it came from deserving of the word If we can't answer that question here on earth how will we know when and if we discover alien life on other worlds The question hangs over some of society's most charged conflicts whether a fertilized egg is a living person for example and when we ought to declare a person legally dead Life's Edge is an utterly fascinating investigation that no one but one of the most celebrated science writers of our generation could craft Zimmer journeys through the strange experiments that have attempted to re-create life Literally hundreds of definitions of what that should look like now exist but none has yet emerged as an obvious winner Lists of what living things have in common do not add up to a theory of life It's never clear why some items on the list are essential and others not Coronaviruses have altered the course of history and yet many scientists maintain they are not alive Chemists are creating

droplets that can swarm sense their environment and multiply Have they made life in the lab Whether he is handling pythons in Alabama or searching for hibernating bats in the Adirondacks Zimmer revels in astounding examples of life at its most bizarre He tries his own hand at evolving life in a test tube with unnerving results Charting the obsession with Dr Frankenstein s monster and how the world briefly believed radium was the source of all life Zimmer leads us all the way into the labs and minds of researchers engineering life from scratch

The Rise and Fall of Adam and Eve Stephen Greenblatt,2017-09-12 Endlessly illuminating and a sheer pleasure to read Jack Miles author of God A Biography Daring to take the great biblical account of human origins seriously but without credulity The most influential story in Western cultural history the biblical account of Adam and Eve is now treated either as the sacred possession of the faithful or as the butt of secular jokes Here acclaimed scholar Stephen Greenblatt explores it with profound appreciation for its cultural and psychological power as literature From the birth of the Hebrew Bible to the awe inspiring contributions of Augustine D rer and Milton in bringing Adam and Eve to vivid life Greenblatt unpacks the story s many interpretations and consequences over time Rich allegory vicious misogyny deep moral insight narrow literalism and some of the greatest triumphs of art and literature all can be counted as children of our first parents

Novum Organum II Chris Edwards,2014-04-10 In 1620 the British politician and philosopher Francis Bacon published Novum Organum New Method and formalized the previously scattershot methods of scientific experimentation into a method able to be replicated In due time the Western world would build an intellectual empire on the basis of Bacon s concepts of scientific research The West s university and its scientific and medical systems all stem from Bacon s philosophy But after nearly four hundred years it is time for something new again In mathematics theoretical physics and philosophy a quiet revolution has begun Thinkers who can study across disciplines and form analogies who take seriously the History and Philosophy of Science and its problems of metaphysics and epistemology have been making impressive breakthroughs These methods have been up until now as random as the process of experimentation was in Bacon s day This timely book has come to formalize these methods build upon Bacon s scientific research model and to ultimately go beyond it

On Liberty - Ed. Kahn John Stuart Mill,2014-10-06 In this work Mill reflects on the struggle between liberty and authority and defends the view that the only purpose for which power can be rightfully exercised over any member of a civilized community against his will is to prevent harm to others He questions attempts to limit freedom of conscience and religion freedom to pursue one s own interests and freedom to unite and he defends a liberal political and social order in which there is considerable room for personal development and freedom of association This new Broadview Edition demonstrates the ways in which Mill s intellectual landscape differed markedly from our own while also drawing attention to the reasons why the work remains relevant and essential reading in the present day Appendices include antecedents to Mill s work critical discussions by his contemporaries and related writings by Mill Please note Broadview offers two separate editions of On Liberty The Kahn edition is particularly relevant to readers who are

interested in how the work is situated in the history of political philosophy whereas the Alexander edition is recommended to those most interested in the work's Victorian literary and social contexts The Brain, the Mind and the Self Arnold Goldberg, 2015-05-01 Psychoanalysis enjoyed an enormous popularity at one time but has recently fallen out of favor as new psychiatric medications have dominated the treatment of mental illness and a new interest in the brain and neuroscience begins to dominate the theory as to the cause and cure of mental illness How do we distinguish between the brain the mind and the self In his new book Arnold Goldberg approaches this question from a psychoanalytic perspective and examines how recent research findings can shed light on it He repositions psychoanalysis as an interpretive science that is a different activity to most other sciences that are considered empirical Giving clear coverage of the various psychoanalytic models of the mind and the self Goldberg examines how these theories fare against neuroscientific evidence and what implications these have for psychoanalytic clinical practice The Brain the Mind and the Self A psychoanalytic road map sets up evidence based robust psychoanalytic theory and practice that will give psychoanalysts social workers and practicing psychologists a valuable insight into the future of psychoanalysis Arnold Goldberg M D was born and raised in Chicago and trained at the University of Illinois Michael Reese Hospital and the Institute for Psychoanalysis in Chicago He is recently retired from the Cynthia Oudejans Harris MD chair and Professor of Psychiatry at Rush Medical Center
