Geek Sublime Vikram Chandra, 2014-09-02 The nonfiction debut from the author of the international bestseller *Sacred Games* about the surprising overlap between writing and computer coding Vikram Chandra has been a computer programmer for almost as long as he has been a novelist In this extraordinary new book his first work of nonfiction he searches for the connections between the worlds of art and technology Coders are obsessed with elegance and style just as writers are but do the words mean the same thing to both Can we ascribe beauty to the craft of writing code Exploring such varied topics as logic gates and literary modernism the machismo of tech geeks the omnipresence of an Indian Mafia in Silicon Valley and the writings of the eleventh century Kashmiri thinker Abhinavagupta *Geek Sublime* is both an idiosyncratic history of coding and a fascinating meditation on the writer's art Part literary essay part technology story and part memoir it is an engrossing original and heady book of sweeping ideas

Geek Sublime Vikram Chandra, 2014 Vikram Chandra is the award winning author of two acclaimed novels and a collection of short stories and has been a computer programmer for almost as long as he has been a writer In this book he looks at the connection between these two worlds of art and technology

Popular Postcolonialisms Nadia Atia, Kate Houlden, 2018-07-04 Drawing together the insights of postcolonial scholarship and cultural studies *Popular Postcolonialisms* questions the place of the popular in the postcolonial paradigm Multidisciplinary in focus this collection explores the extent to which popular forms are infused with colonial logics and whether they can be employed by those advocating for change It considers a range of fiction film and non hegemonic cultural forms engaging with topics such as environmental change language activism and cultural imperialism alongside analysis of figures like Tarzan and Frankenstein Building on the work of cultural theorists it asks whether the popular is actually where elite conceptions of the world may best be challenged It also addresses middlebrow cultural production which has tended to be seen as antithetical to radical traditions asking whether this might in fact form an unlikely realm from which to question critique or challenge colonial tropes Examining the ways in which the imprint of colonial history is in evidence interrogated mythologized or sublimated within popular cultural production this book raises a series of speculative questions exploring the interrelation of the popular and the postcolonial

Movers and Makers Parminder Bhachu, 2021-03-30 We live in times of extreme change There could be no better time than now to interrogate the lives of new kinds of people movers and makers who navigate fragility and uncertainty to create with daring often against great odds Parminder Bhachu uses their dramatic life stories to uncover what makes for creativity and resilience in times of disequilibrium What can be learnt from their creative moxie as innovators outside establishment powers Why has their creative reach grown exponentially in our globally connected twenty first century How have their abilities to innovate been catalyzed without subscription to knowledge hierarchies and monopolies These culturally dexterous movers who possess movement capital advanced with every migration have translated ancient maker and craft skills into transforming modern technology science design architecture and the arts

Generous inclusive and deeply collaborative they are at the heart of open source sharing for collective intelligence the common good and the maker movement They invigorate the economies they reside in greatly enhancing creative capacities and reach Bhachu herself a multiple migrant maker offers us a model for a hopeful way forward bringing her unique ethnographic insights to illuminate what can be learnt about thriving in worlds of flux The Hyperlocal in Eighteenth- and Nineteenth-Century Literary Space Nicholas Birns,2019-08-26 This book examines literary representations of hyperlocal spaces that subvert the idea of grounded and organic spatial identities Figures such as the pond the scientific particle and Wedgwood creamware often go unnoticed but they exemplify important shifts in culture and aesthetics in the eighteenth and nineteenth centuries The Hyperlocal in Eighteenth and Nineteenth Century Literary Space argues that these objects as well as locations such as alcoves in remote shires city inns and mountain retreats were portrayed by writers in the late eighteenth and early to mid nineteenth centuries as gambits that challenged cultural hegemonies It shows that the hyperlocal space or object though particular reaches beyond itself affording an elasticity that can allow those things that seem beneath notice to reveal broader cultural significance **Overcomplicated** Samuel Arbesman,2017-06-20 Why did the New York Stock Exchange suspend trading without warning on July 8 2015 Why did certain Toyota vehicles accelerate uncontrollably against the will of their drivers Why does the programming inside our airplanes occasionally surprise its creators After a thorough analysis by the top experts the answers still elude us You don t understand the software running your car or your iPhone But here s a secret neither do the geniuses at Apple or the Ph D s at Toyota not perfectly anyway No one not lawyers doctors accountants or policy makers fully grasps the rules governing your tax return your retirement account or your hospital s medical machinery The same technological advances that have simplified our lives have made the systems governing our lives incomprehensible unpredictable and overcomplicated In Overcomplicated complexity scientist Samuel Arbesman offers a fresh insightful field guide to living with complex technologies that defy human comprehension As technology grows more complex Arbesman argues its behavior mimics the vagaries of the natural world more than it conforms to a mathematical model If we are to survive and thrive in this new age we must abandon our need for governing principles and rules and accept the chaos By embracing and observing the freak accidents and flukes that disrupt our lives we can gain valuable clues about how our algorithms really work What s more we will become better thinkers scientists and innovators as a result Lucid and energizing this book is a vital new analysis of the world heralded as modern for anyone who wants to live wisely

Narrative as Virtual Reality 2 Marie-Laure Ryan,2015-12-01 Rethinking textuality mimesis and the cognitive processing of texts in light of new modes of artistic world construction Winner of the Aldo and Jeanne Scaglione Prize for Comparative Literary Studies from the Modern Language Association of America Is there a significant difference between engagement with a game and engagement with a movie or novel Can interactivity contribute to immersion or is there a trade off between the immersive world aspect of texts and their interactive game dimension As Marie Laure Ryan demonstrates in

Narrative as Virtual Reality 2 the questions raised by the new interactive technologies have their precursors and echoes in pre electronic literary and artistic traditions Approaching the idea of virtual reality as a metaphor for total art Ryan applies the concepts of immersion and interactivity to develop a phenomenology of narrative experience that encompasses reading watching and playing The book weighs traditional literary narratives against the new textual genres made possible by the electronic revolution of the past thirty years including hypertext electronic poetry interactive drama digital installation art computer games and multi user online worlds like Second Life and World of Warcraft In this completely revised edition Ryan reflects on the developments that have taken place over the past fifteen years in terms of both theory and practice and focuses on the increase of narrativity in video games and its corresponding loss in experimental digital literature Following the cognitive approaches that have rehabilitated immersion as the product of fundamental processes of world construction and mental simulation she details the many forms that interactivity has taken or hopes to take in digital texts from determining the presentation of signs to affecting the level of story

Track Changes Matthew G. Kirschenbaum, 2016-05-02 Writing in the digital age has been as messy as the inky rags in Gutenberg's shop or the molten lead of a Linotype machine Matthew Kirschenbaum examines how creative authorship came to coexist with the computer revolution Who were the early adopters and what made others anxious Was word processing just a better typewriter or something more

Leibnizing Richard Halpern, 2023-08-15 Why read Leibniz today Can we still learn from him and not just about him This book argues that Leibniz offers a powerful productive model for transdisciplinary thinking that can push back against the narrowness of the humanities today Richard Halpern recasts Leibniz as a great writer as well as a great philosopher demonstrating that his philosophical project cannot be fully understood without taking its literary elements into account He shows Leibniz to be a prescient thinker about art and beauty whose insights into the relationship between aesthetic experience and thought remain invaluable Leibnizing asks readers to follow the dynamic movement of Leibniz's writing instead of attempting to grasp a static philosophical system and to pay careful attention to the rhetorical and stylistic registers of Leibniz's work as well as its conceptual and logical dimensions For philosophers this book offers a novel approach to reading and interpreting Leibniz For literary and other theorists it showcases the relevance of Leibniz's thought to areas from aesthetics to politics and from metaphysics to computer science Written in a lucid and even witty style Leibnizing provides readers with an accessible entryway into Leibniz's sometimes forbidding but ultimately rewarding philosophical vision

The Cambridge Companion to Literature and the Posthuman Bruce Clarke, Manuela Rossini, 2017 This book gathers diverse critical treatments from fifteen scholars of the posthuman and posthumanism together in a single volume
