Bruce

Elder, 2015-10-15 This book deals with the early intellectual reception of the cinema and the manner in which art theorists philosophers cultural theorists and especially artists of the first decades of the twentieth century responded to its advent While the idea persists that early writers on film were troubled by the cinema s lowly form this work proposes that there was another largely unrecognized strain in the reception of it Far from anxious about film s provenance in popular entertainment some writers and artists proclaimed that the cinema was the most important art for the moderns as it exemplified the vibrancy of contemporary life This view of the cinema was especially common among those whose commitments were to advanced artistic practices Their notions about how to recast the art media or the forms forged from those media s materials and the urgency of doing so formed the principal part of the conceptual core of the artistic programs advanced by the vanguard art movements of the first half of the twentieth century This book a companion to the author s previous *Harmony Dissent* examines the Dada and Surrealist movements as responses to the advent of the cinema **Salvador Dalí and the Surrealists** Michael Elsohn Ross, 2003-09-01 The bizarre and often humorous creations of Ren Magritte Joan Mir Salvador Dal and other surrealists are showcased in this activity guide for young artists Foremost among the surrealists Salvador Dal was a painter filmmaker designer performance artist and eccentric self promoter His famous icons including the melting watches double images and everyday objects set in odd contexts helped to define the way people view reality and encourage children to view the world in new ways Dal s controversial life is explored while children trace the roots of some familiar modern images These wild and wonderful activities include making Man Ray inspired solar prints filming a Dali esque dreamscape video writing surrealist poetry making collages and assembling art with found objects **The Unsilvered Screen** Graeme Harper, Rob Stone, 2007 Critics from the UK US Australia Canada and Japan discuss views on canonical surrealist works and the role of surrealism in modern cinema animation digital cinema and documentary **Salvador Dalí** Felix Fanes, Fèlix Fanés, 2007-01-01 Discusses Dali s years in Spain and first years in Paris as a young artist provides a detailed assessment of his revolutionary work and shows how the stage was set for his mature artistic personality *The Age of Gold* Robert Short, 2008 Surrealist cinema as epitomised by *Un Chien Andalou* and *L'Age d'Or* was a knife through the

very heart of the establishment a scorpionic scatological black joke galvanised by the irrational the uncanny and the spectre of de Sade Author Robert Short revisits these two seminal films and documents the experimental cinematic theories of Antonin Artaud and the filming of his Surrealist scenario *The Seashell and the Clergyman* Short also looks at the work of Hans Richter Jean Cocteau Marcel Duchamp and Man Ray *Figures of Desire* Linda Williams, 1992-01-01 An important contribution to film theory Williams has a fluid assured style She is clearly in command of the subject She s made a strong and original argument for the psychoanalytic basis of Surrealism James Monaco author of *The New Wave* [Surrealism, Cinema, and the Search for a New Myth](#) Kristoffer Noheden, 2017-06-28 This book examines post war surrealist cinema in relation to surrealism s change in direction towards myth and magic following World War II Intermedial and interdisciplinary the book unites cinema studies with art history and the study of Western esotericism closely engaging with a wide range of primary sources including surrealist journals art exhibitions and writings Kristoffer Noheden looks to the Danish surrealist artist Wilhelm Freddie s forays into the experimental short film the French poet Benjamin P ret s contribution to the documentary film *L Invention du monde* the Argentinean born filmmaker Nelly Kaplan s feature films and the Czech animator Jan Svankmajer s work in short and feature films The book traces a continuous engagement with myth and magic throughout these films uncovering a previously unknown strain of occult imagery in surrealist cinema It broadens the scope of the study of not only surrealist cinema but of surrealism across the art forms *Surrealism Cinema and the Search for a New Myth* will appeal to film scholars art historians and those interested in the impact of occultism on modern culture film and the arts

Consuming Surrealism in American Culture Sandra Zalman, 2017-07-05 *Consuming Surrealism in American Culture* Dissident Modernism argues that Surrealism worked as a powerful agitator to disrupt dominant ideas of modern art in the United States Unlike standard accounts that focus on Surrealism in the U S during the 1940s as a point of departure for the ascendance of the New York School this study contends that Surrealism has been integral to the development of American visual culture over the course of the twentieth century Through analysis of Surrealism in both the museum and the marketplace Sandra Zalman tackles Surrealism s multi faceted circulation as both elite and popular Zalman shows how the American encounter with Surrealism was shaped by Alfred Barr William Rubin and Rosalind Krauss as these influential curators mobilized Surrealism to compose to concretize or to unseat narratives of modern art in the 1930s 1960s and 1980s alongside Surrealism s intersection with advertising Magic Realism Pop and the rise of contemporary photography As a popular avant garde Surrealism openly resisted art historical classification forcing the supposedly distinct spheres of modernism and mass culture into conversation and challenging theories of modern art in which it did not fit in large part because of its continued relevance to contemporary American culture *Reconceptualizing the Digital Humanities in Asia* Kaby Wing-Sze Kung, 2020-09-09 This book examines new forms of representation that have changed our perception and interpretation of the humanities in an Asian and digital context In analyzing written and visual texts such as the use of digital

technology and animation in different works of art originating from Asia the authors demonstrate how literature history and culture are being redefined in spatialized relations amid the trend of digitization Research studies on Asian animation are in short supply and so this volume provides new and much needed insights into how art literature history and culture can be presented in innovative ways in the Asian digital world The first section of this volume focuses on the new conceptualization of the digital humanities in art and film studies looking at the integration of digital technologies in museum narration and cinematic production The second section of the volume addresses the importance of framing these discussions within the context of gender issues in the digital world discussing how women are represented in different forms of social media The third and final section of the book explores the digital world s impacts on people s lives through different forms of digital media from the electromagnetic unconscious to digital storytelling and digital online games This book presents a novel contribution to the burgeoning field of the digital humanities by informing new forms of representation and interpretations and demonstrating how digitization can influence and change cultural practices in Asia and globally It will be of interest to students and scholars interested in digitization from the full spectrum of humanities disciplines including art literature film music visual culture media and animation gaming and Internet culture This is a well written book and I enjoyed reading it The first impression of the book is that it is very innovative a down to the earth academic volume that discusses digital culture Professor Anthony Fung Professor Director School of Journalism and Communication The Chinese University of Hong Kong This book has contributed to the existing field of humanities by informing new forms of representation and interpretations and how digitization may change cultural practices There is comprehensive information on how the humanities in the digital age can be applied to a wide range of subjects including art literature film pop music music videos television animation games and internet culture Dr Samuel Chu Associate Professor The Faculty of Education The University of Hong Kong
