Parental Liability in EU Competition Law Peter Whelan,2023-08-10 In enforcing EU competition law the Commission employs a unique doctrine of parental antitrust liability it imposes fines on the parent company of an infringing subsidiary in cases where the parent exercises decisive influence over the subsidiary's commercial policy Critics of this contentious aspect of EU competition law believe that the doctrine is unfair ineffective obscure disproportionate contrary to due process and based upon a dubious if not extremely flimsy justificatory foundation Such criticism raises serious and unanswered questions about the legitimacy of the Commission's efforts to enforce competition law Parental Liability in EU Competition Law A Legitimacy Focused Approach is the first monograph to be dedicated to this controversial topic Written by Professor Peter

Whelan the book contends that although the general concept of parental liability can be justified in principle the current EU level doctrine of parental antitrust liability in fact suffers from a distinct and problematic lack of legitimacy More specifically the said doctrine displays significant deficiencies with respect to effectiveness fairness and legality Given this undesirable state of affairs Parental Liability in EU Competition Law offers a fully rationalised reformulated approach to parental antitrust liability for EU competition law violations that is built around the notion of parental fault That approach provides a solid normative account of how to impose parental antitrust liability in a manner that is theoretically robust effective in practice fair in substance and legally sound *EU Competition Law* Ariel Ezrachi, 2024-06-27 This book should be in the library of every competition law practitioner and academic The summary of cases is first class But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States Ali Nikpay Gibson Dunn Crutcher LLP This unique book is designed as a working tool for the study and practice of European competition law focused on case law analysis Each chapter begins with an introduction which outlines the relevant laws regulations and guidelines for each of the topics setting the analytical foundations for the case entries Within this framework cases are reviewed in summary form accompanied by useful analysis and commentary The 8th edition includes recent judgments from the European Court of Justice and decisions from the European Commission on the scope of object and effects based analysis abuse of dominance and merger control It examines developments in regulation and the interface between new instruments such as the DMA and DSA and competition law enforcement *Collective Redress and EU Competition Law* Eda Şahin, 2018-12-07 Exploring obstacles to effective compensation of victims of competition infringements this book categorises the types of victims harmed and the types of losses arisen from these infringements to identify to what extent there is a need for enhanced private competition law enforcement in the European Union EU and the best way to address this need It shows that there is a genuine need for facilitating consumer damages actions and that consumer claims are the only claims that can be pursued in a collective redress action In order to compensate consumers and overcome barriers to effective enforcement of their right to damages it structures a collective redress action for consumers by considering the following elements i the formation of the group ii the type of representative party iii funding mechanisms and iv calculation and distribution of damages
