Designing Experimental Research In Archaeology Examining Technology Through Production And Use:

Designing Experimental Research in Archaeology Jeffrey R. Ferguson, 2010-05-15 Each chapter addresses a particular classification of material culture ceramics stone tools perishable materials composite hunting technology butchering practices and bone tools and experimental zooarchaeology detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls The experiments follow coherent and consistent research designs and procedures that are given theoretical context Contributors outline methods that will serve as a guide in future experiments This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology

Archaeology in Practice Jane Balme, Alistair Paterson, 2014-01-14 This much enhanced new edition of the highly accessible guide to practical archaeology is a vital resource for students It features the latest methodologies a wealth of case studies from around the world and contributions from leading specialists in archaeological materials analysis New edition updated to include the latest archaeological methods an enhanced focus on post excavation analysis and new material including a dedicated chapter on analyzing human remains Covers the full range of current analytic methods such as analysis of stone tools human remains and absolute dating Features a user friendly structure organized according to material types such as animal bones ceramics and stone artifacts as well as by thematic topics ranging from dating techniques to report writing and ethical concerns Accessible to archaeology students at all levels with detailed references and extensive case studies featured throughout

Doing Experimental Media Archaeology Andreas Fickers, Annie Oever, 2022-12-31 This book offers a plea to take the materiality of media technologies and the sensorial and tacit dimensions of media use into account in the writing of the histories of media and technology In short it is a bold attempt to question media history from the perspective of an experimental media archaeology approach It offers a systematic reflection on the value and function of hands on experimentation in research and teaching *Doing Experimental Media Archaeology Theory* is the twin volume to *Doing Experimental Media Archaeology Practice* authored by Tim van der Heijden and Aleksander Kolkowski

The Archaeology of Science Michael Brian Schiffer, 2013-04-19 This manual pulls together and illustrates with interesting case studies the variety of specialized and generalized archaeological research strategies that yield new insights into science Throughout the book there are templates consisting of questions to help readers visualize and design their own projects The manual seeks to be as general as possible applicable to any society and so science is defined as the creation of useful knowledge the kinds of knowledge that enable people to make predictions The chapters in Part I discuss the scope of the archaeology of science and furnish a conceptual foundation for the remainder of the book Next Part II presents several specialized but widely practiced research strategies that contribute to the archaeology of science In order to thoroughly ground the manual in real life applications Part III presents lengthy case studies that feature the use of historical and archaeological evidence in the study of scientific activities

Doing Experimental Media Archaeology Tim van

der Heijden,Aleksander Kolkowski,2022-12-31 In recent years there has been a growing interest in the use of experimental approaches to the study of media histories and their cultures Doing media archaeological experiments such as historical re enactments and hands on simulations with media historical objects helps us to explore and better understand the workings of past media technologies and their practices of use By systematically reflecting on the methodological underpinnings of experimental media archaeology as a relatively new approach in media historical research and teaching this book aims to serve as a practical handbook for doing media archaeological experiments Doing Experimental Media Archaeology Practice is the twin volume to Doing Experimental Media Archaeology Theory authored by Andreas Fickers and Annie van den Oever

Egyptology in the Present Carolyn Graves-Brown,2015-06-01 This volume builds bridges between usually separate social groups between different methodologies and even between disciplines It is the result of an innovative conference held at Swansea University in 2010 which brought together leading craftspeople and academics to explore the all too often opposed practices of experimental and experiential archaeology The focus is upon Egyptology but the volume has a wider importance The experimental method is privileged in academic institutions and thus perhaps is subject to clear definitions It tends to be associated with the scientific and technological In opposition the experiential is more rarely defined and is usually associated with schoolchildren museums and heritage centres it is often criticised for being unscientific The introductory chapter of this volume examines the development of these traditionally assumed differences giving for the first time a critical and careful definition of the experiential in relation to the experimental The two are seen as points on a continuum with much common ground This claim is borne out by succeeding chapters which cover such topics as textiles woodworking and stoneworking And Salima Ikram Professor of Egyptology at the American University in Cairo here demonstrates remarkably that our understanding of the classic Egyptian funerary practice of mummification benefits from both scientific experimental and sensual experiential approaches The volume however is important not only for Egyptology but for archaeological method more generally The papers illuminate the pioneering of individuals who founded modern archaeological practice Several papers are truly groundbreaking and deserve to circulate far beyond Egyptology Thus the archaeologist Marquardt Lund tackles the problem of understanding the earliest known depictions of flint knife manufacture those from an Egyptian tomb dated around 1900 BC He shows the importance of thinking outside traditional i e modern knapping practice Lund s knapping method guided by the tomb depictions is surprising but effective and very different from that presented in manuals of lithic technology or taught in academic institutions *Food Research* Janet Chrzan,John Brett,2017-01-01 Biocultural and archaeological research on food past and present often relies on very specific precise methods for data collection and analysis These are presented here in a broad based review Individual chapters provide opportunities to think through the adoption of methods by reviewing the history of their use along with a discussion of research conducted using those methods A case study from the author s own work is included in each chapter to illustrate why the methods were adopted in that

particular case along with abundant additional resources to further develop and explore those methods

Research Methods for Anthropological Studies of Food and Nutrition Janet Chrzan, John Brett, 2017-02-01 The dramatic increase in all things food in popular and academic fields during the last two decades has generated a diverse and dynamic set of approaches for understanding the complex relationships and interactions that determine how people eat and how diet affects culture These volumes offer a comprehensive reference for students and established scholars interested in food and nutrition research in Nutritional and Biological Anthropology Archaeology Socio Cultural and Linguistic Anthropology Food Studies and Applied Public Health

Explaining and Exploring Diversity in Agricultural Technology Annelou van Gijn, John Whittaker, Patricia C. Anderson, 2014-08-29 This volume is the outcome of collaborative European research among archaeologists archaeobotanists ethnographers historians and agronomists and frequently uses experiments in archaeology It aims to establish new common ground for integrating different approaches and for viewing agriculture from the standpoint of the human actors involved Each chapter provides an interdisciplinary overview of the skills used and the social context of the pursuit of agriculture highlighting examples of tools technologies and processes from land clearance to cereal processing and food preparation This is the second of three volumes in the EARTH monograph series The dynamics of non industrial agriculture 8 000 years of resilience and innovation which shows the great variety of agricultural practices in human terms in their social political cultural and legal contexts

The Oxford Handbook of Southwest Archaeology Barbara Mills, Severin Fowles, 2017-08-15 The American Southwest is one of the most important archaeological regions in the world with many of the best studied examples of hunter gatherer and village based societies Research has been carried out in the region for well over a century and during this time the Southwest has repeatedly stood at the forefront of the development of new archaeological methods and theories Moreover research in the Southwest has long been a key site of collaboration between archaeologists ethnographers historians linguists biological anthropologists and indigenous intellectuals This volume marks the most ambitious effort to take stock of the empirical evidence theoretical orientations and historical reconstructions of the American Southwest Over seventy top scholars have joined forces to produce an unparalleled survey of state of archaeological knowledge in the region Themed chapters on particular methods and theories are accompanied by comprehensive overviews of the culture histories of particular archaeological sequences from the initial Paleoindian occupation to the rise of a major ritual center in Chaco Canyon to the onset of the Spanish and American imperial projects The result is an essential volume for any researcher working in the region as well as any archaeologist looking to take the pulse of contemporary trends in this key research tradition
