De Terugkeer Van Martin Guerre:

The Flight of the Shepherd Arij Ouweneel, 2005 Three lines of argument are developed in this book The first discusses the prospects of microhistory as an instrument for uncovering the relationship between culture and the personal experience of an individual in historical documents The second follows its theoretical underpinnings arguing in clinical terms what may look like thick theorization to many historians and ethnohistorians that in our contemporary academics only cognitive science can be the leading approach to answer the question of the relationship between culture and an individual's experiences Cognitive science studies internal mental processes like memory attitudes motivation and reflection It has shown that the brain's guesses of what is happening around it are based on an extensive unconscious system of conceptual metaphor that is part of our everyday conceptual systems and that can be thought of as a kind of language of the unconscious The third argument brings the others together in the specific case of conscious dreaming as can be recognized in the documents of Mexican cult leader Anton the Shepherd and his movements from 1759-61 In particular it interprets a flight to Purgatory one of Anton's experiences The unfolding of the three arguments intertwined as they are eventually should help to deepen the understanding of the ways in which Anton the Shepherd operated within the eighteenth century Central Mexican colonial milieu with his experiences in Purgatory illustrating the cultural resilience of Amerindian peoples in the region **All**
