The Ashgate Research Companion to Dutch Art of the Seventeenth Century Wayne Franits, 2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently

Illustrated Religious Texts in the North of Europe, 1500-1800 Feike Dietz, Adam Morton, Lien Roggen, 2016-12-05 In recent years many historians have argued that the Reformation did not as previously thought hamper the development of Northern European visual culture but rather gave new impetus to the production diffusion and reception of visual materials in both Catholic and Protestant milieus This book investigates the crosscurrents of exchange in the realm of illustrated religious literature within and beyond confessional and national borders and against the background of recent insights into the importance of on the one hand material as well as on the other hand sensual and emotional aspects of early modern culture Each chapter in the volume helps illuminate early modern religious culture from the perspective of the production of illustrated religious texts to see the book as object a point at which various vectors of early modern society met Case studies together with theoretical contributions shed light on the ways in which illustrated religious books functioned in evolving societies by analysing the use re use and sharing of illustrated religious texts in England France the Low Countries the German States and Switzerland Interpretations based on points of material interaction show us how the most basic binaries of the early modern world Catholic and Protestant word and image public and private were disrupted and negotiated in the realm of the illustrated religious book Through this approach the volume expands the historical appreciation of the place of imagery in post Reformation Europe
