Data Mining, Systems Analysis, and Optimization in Biomedicine Onur Seref, O. Erhun Kundakcioglu, Panos M. Pardalos, 2007-11-26 Gainesville FL U S A 28 30 March 2007 Computational Intelligence in Data Mining - Volume 1

Lakhmi C. Jain, Himansu Sekhar Behera, Jyotsna Kumar Mandal, Durga Prasad Mohapatra, 2014-12-10 The contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science i.e. computational intelligence and data mining Data Mining aims at the automatic discovery of underlying non trivial knowledge from datasets by applying intelligent analysis techniques The interest in this research area has experienced a considerable growth in the last years due to two key factors a knowledge hidden in organizations databases can be exploited to improve strategic and managerial decision making b the large volume of data managed by organizations makes it impossible to carry out a manual analysis The book addresses different methods and techniques of integration for enhancing the overall goal of data mining The book helps to disseminate the knowledge about some innovative active research directions in the field of data mining machine and computational intelligence along with some current issues and applications of related topics

Data Mining in Agriculture Antonio Mucherino, Petraq Papajorgji, Panos M. Pardalos, 2009-09-22 Data Mining in Agriculture represents a comprehensive effort to provide graduate students and researchers with an analytical text on data mining techniques applied to agriculture and environmental related fields This book presents both theoretical and practical insights with a focus on presenting the context of each data mining technique rather intuitively with ample concrete examples represented graphically and with algorithms written in Matlab Examples and exercises with solutions are provided at the end of each chapter to facilitate the comprehension of the material For each data mining technique described in the book variants and improvements of the basic algorithm are also given

Optimization in Medicine Carlos J. S. Alves, Panos M. Pardalos, Luis Nunes Vicente, 2007-12-20 Optimization has become an essential tool in addressing the limitation of resources and need for better decision making in the medical field Both continuous and discrete mathematical techniques are playing an increasingly important role in understanding several fundamental problems in medicine This volume presents a wide range of medical applications that can utilize mathematical computing Examples include using an algorithm for considering the seed reconstruction problem in brachytherapy and using optimization classification models to assist in the early prediction diagnosis and detection of diseases Discrete optimization techniques and measures derived from the theory of nonlinear dynamics with analysis of multi electrode electroencephalographic EEG data assist in predicting impending epileptic seizures Mathematics in medicine can also be found in recent cancer research Sophisticated mathematical models and optimization algorithms have been used to generate treatment plans for radionuclide implant and external beam radiation therapy Optimization techniques have also been used to automate the planning process in Gamma Knife treatment as well as to address a variety of medical image registration problems This work grew out of a workshop on

optimization which was held during the 2005 CIM Thematic Term on Optimization in Coimbra Portugal It provides an overview of the state of the art in optimization in medicine and will serve as an excellent reference for researchers in the medical computing community and for those working in applied mathematics and optimization
