Data-driven Decision-making for Product Managers Gabriel Steinhardt,2024-11-25 This book is an essential guide for product managers seeking to harness the power of data to drive their product decisions It is a detailed resource for developing and maintaining data literacy a core skill for product managers Through a structured approach supported by practical insights and illustrative examples readers will learn to prioritize decisions based on quantitative data rather than intuition understand core data concepts and analyze and leverage data effectively Product managers will discover how data can transform decision making processes enabling evidence based selection prioritization and resource allocation for product features By using customer feedback user behavior data market research and performance metrics product managers can foster a culture that leverages data to create successful products This introductory primer and reference guide is indispensable for product managers aiming to integrate data driven methodologies into their practice ensuring their decisions are informed strategic and impactful

Data-Driven Approach for Bio-medical and Healthcare Nilanjan Dey,2022-10-27 The book presents current research advances both academic and industrial in machine learning artificial intelligence and data analytics for biomedical and healthcare applications The book deals with key challenges associated with biomedical data analysis including higher dimensions class imbalances smaller database sizes etc It also highlights development of novel pattern recognition and machine learning methods specific to medical and genomic data which is extremely necessary but highly challenging The book will be useful for healthcare professionals who have access to interesting data sources but lack the expertise to use data mining effectively [Handbook of Dynamic Data Driven](#)

[Applications Systems](#) Frederica Darema,Erik P. Blasch,Sai Ravela,Alex J. Aved,2023-09-14 This Second Volume in the series [Handbook of Dynamic Data Driven Applications Systems](#) DDDAS expands the scope of the methods and the application areas presented in the first Volume and aims to provide additional and extended content of the increasing set of science and engineering advances for new capabilities enabled through DDDAS The methods and examples of breakthroughs presented in the book series capture the DDDAS paradigm and its scientific and technological impact and benefits The DDDAS paradigm and the ensuing DDDAS based frameworks for systems analysis and design have been shown to engender new and advanced capabilities for understanding analysis and management of engineered natural and societal systems applications systems and for the commensurate wide set of scientific and engineering fields and applications as well as foundational areas The DDDAS book series aims to be a reference source of many of the important research and development efforts conducted under the rubric of DDDAS and to also inspire the broader communities of researchers and developers about the potential in

their respective areas of interest of the application and the exploitation of the DDDAS paradigm and the ensuing frameworks through the examples and case studies presented either within their own field or other fields of study As in the first volume the chapters in this book reflect research work conducted over the years starting in the 1990 s to the present Here the theory and application content are considered for Foundational Methods Materials Systems Structural Systems Energy Systems Environmental Systems Domain Assessment address challenges that ML alone does not and also show how ML in combination with DDDAS based methods can deliver the advanced capabilities sought likewise infusion of DDDAS like approaches in NN methods strengthens such methods Moreover the DDDAS based Digital Twin or Dynamic Digital Twin goes beyond the traditional DT notion where the model and the physical system are viewed side by side in a static way to a paradigm where the model dynamically interacts with the physical system through its instrumentation per the DDDAS feed back control loop between model and instrumentation
