Winning the Institutional Investing Race Michael Bunn, Zack Campbell, 2014-11-22 The complexity of investments continues to grow and institutional pools of capital from endowments to pension funds are suffering from too much risk and not enough return Yet managing

these investments and creating and implementing governance structures are seldom an integral part of the organization's core mission or its operations. That's the way it has always been, say many directors and executives. As a result, a board of directors or investment committee often believes it needs to make all the decisions or outsource money management and hope for the best. As *Winning the Institutional Investing Race: A Guide for Directors and Executives* makes clear, that sentiment is a big mistake that can lead to poor returns, reduced capital to employ on behalf of the organizational mission, and even charges of malfeasance on the part of directors. Authors Michael Bunn and Zack Campbell, who advise companies and institutions on best practices in institutional investment, are determined to help institutions and companies learn to manage their capital funds like the real businesses they are. This hands-on book will show you the importance of governance in creating and overseeing investment policy; the roles and responsibilities of key stakeholders, especially board members; how to construct an effective investment policy statement; an overview of the four primary governance models available to trustees and the pros and cons of each; how to work with fund managers in-house or out to get the highest returns possible. Besides governance, this book covers a wide array of investment topics: modern portfolio theory, risk application, investment manager evaluation and manager search, asset allocation and diversification, among others, while introducing a new and successful approach to managing investment portfolios. The goal is to provide a grounding in investing for those involved in making financial decisions at the board level. As the authors make clear, it is not possible just to beat the averages but to do so consistently. *Winning the Institutional Investing Race: A Guide for Directors and Executives* offers a healthy rethinking of investment management and governance for any organization or board that oversees institutional investments and manages those making investment decisions. Most important, it shows how directors and managers can maintain their fiduciary responsibilities to the organizations they serve while maximizing investment returns.

Argus Developer in Practice Tim M. Havard, 2014-02-28. This book is a practical guide to using Argus Developer, the world's most widely used real estate development feasibility modeling software. Using practical examples and many case studies, it takes readers beyond basic training and provides the in-depth knowledge required to analyze potential real estate deals and help ensure a profitable development. *Argus Developer in Practice* fills an important gap in the market. Argus Developer and its predecessor Circle Developer have long had a dominant position as the primary real estate development appraisal tool. It is used all over the world on a variety of projects ranging from simple residential projects to huge and complex master-planned mixed-use commercial, residential, and leisure projects. It also shines when used to appraise refurbishments of an existing building or complex and upgrading it or turning it into something entirely different. *Argus Developer in Practice*, the first book that concentrates on the practical application and use of the program, goes beyond the manual that comes with it by taking you through the development project appraisal process step by step. In addition, author Tim Havard has over 25 years of experience in carrying out development appraisals both in practice and in teaching at the postgraduate level in UK and

Australian universities He started using the DOS version of Circle Developer in 1990 then worked for both Circle and Argus training clients on the software in the UK continental Europe and the Middle East Besides showing you how to use the program Havard shows you how to think like a successful real estate developer Using an extensive array of screenshots Argus Developer in Practice delves deeply into practical use of the program by offering case studies of varying complexity that will help real estate professionals not just analyze development projects but also learn how the best minds in real estate analyze a project s potential You will learn How to model both simple projects and complex mixed use and multi phased investment schemes How to model new uses for existing properties How to think through real estate project problems How to analyze a potential development project in depth By using the program efficiently and making use of its more advanced features you can help ensure a profitable project without the surprises that accompany most real estate ventures Argus Developer in Practice therefore provides something priceless peace of mind
