Conifers of California is the first book entirely devoted to the state's native cone bearing trees and shrubs. Richly illustrated, it serves as both a natural history and field guide. Each species narrative is accompanied by a full page color botanical illustration, photographs from the wild, detailed identification information, and a range map. California is home to more than 50 native species of pines, fir, spruces, junipers, hemlocks, and other conifers. Conifers of California covers the state's world renowned cone bearers such as coast redwood, giant sequoia, and bristlecone pines, and also features its many other rare and unusual conifers such as Torrey pine, Santa Lucia fir, and Brewer spruce.
