Istanbul - Kushta - Constantinople Christoph Herzog, Richard Wittmann, 2018-10-10 Istanbul Kushta Constantinople presents twelve studies that draw on contemporary life narratives that shed light on little explored aspects of nineteenth century Ottoman Istanbul As a broad category of personal writing that goes beyond the traditional confines of the autobiography life narratives range from memoirs letters reports travelogues and descriptions of daily life in the city and its different neighborhoods By focusing on individual experiences and perspectives life narratives allow the historian to transcend rigid political narratives and to recover lost voices especially of those underrepresented groups including women and members of non Muslim communities The studies of this volume focus on a variety of narratives produced by Muslim and Christian women by non Muslims and Muslims as well as by natives and outsiders alike They dispel European Orientalist stereotypes and cross class divides and ethnic identities Travel accounts of outsiders provide us with valuable observations of daily life in the city that residents often overlooked

Hagia Sophia, 1850-1950 Robert S. Nelson, 2004-07-14 Hagia Sophia the Church of Holy Wisdom sits majestically atop the plateau that commands the straits separating Europe and Asia Located near the acropolis of the ancient city of Byzantium

this unparalleled structure has enjoyed an extensive and colorful history as it has successively been transformed into a cathedral mosque monument and museum In *Hagia Sophia* 1850 1950 Robert S Nelson explores its many lives Built from 532 to 537 as the Cathedral of Constantinople Hagia Sophia was little studied and seldom recognized as a great monument of world art until the nineteenth century and Nelson examines the causes and consequences of the building s newly elevated status during that time He chronicles the grand dome s modern history through a vibrant cast of characters emperors sultans critics poets archaeologists architects philanthropists and religious congregations some of whom spent years studying it others never visiting the building But as Nelson shows they all had a hand in the recreation of Hagia Sophia as a modern architectural icon By many means and for its own purposes the West has conceptually transformed Hagia Sophia into the international symbol that it is today While other books have covered the architectural history of the structure this is the first study to address its status as a modern monument With his narrative of the building s rebirth Nelson captures its importance for the diverse communities that shape and find meaning in Hagia Sophia His book will resonate with cultural architectural and art historians as well as with those seeking to acquaint themselves with the modern life of an inspired and inspiring building **Scribner's Handbook of Travel** ,1924 **Harvard Studies in Classical Philology** Harvard University Department of Classics,1890
