power than any king president or Supreme Court justice to decide who can speak and who can be heard How will advanced brain scan technology affect the constitutional right against self incrimination And on a more elemental level should people have the right to manipulate their genes and design their own babies Should we be allowed to patent new forms of life that seem virtually human The constitutional challenges posed by technological progress are wide ranging with potential impacts on nearly every aspect of life in America and around the world The authors include Jamie Boyle Duke Law School Eric Cohen and Robert George Princeton University Jack Goldsmith Harvard Law School Orin Kerr George Washington University Law School Lawrence Lessig Harvard Law School Stephen Morse University of Pennsylvania Law School John Robertson University of Texas Law School Christopher Slobogin Vanderbilt Law School O Carter Snead Notre
