Constitutional Patriotism Constitutional Patriotism:

Constitutional Patriotism Jan-Werner Müller, 2009-01-10 Constitutional Patriotism offers a new theory of citizenship and civic allegiance for today's culturally diverse liberal democracies. Rejecting conventional accounts of liberal nationalism and cosmopolitanism, Jan-Werner Müller argues for a form of political belonging centered on universalist norms adapted for specific constitutional cultures. At the same time, he presents a novel approach to thinking about political belonging and the preconditions of democratic legitimacy beyond the nation-state. The book takes the development of the European Union as a case study, but its lessons apply also to the United States and other parts of the world. Müller's essay starts with an engaging historical account of the origins and spread of the concept of constitutional patriotism: the idea that political attachment ought to center on the norms and values of a liberal democratic constitution rather than a national culture or the global human community. In a more analytical part, he then proposes a critical conception of citizenship that makes room for dissent and civil disobedience while taking seriously a polity's need for stability over time. Müller's theory of constitutional patriotism responds to the challenges of the de facto multiculturalism of today's states with a number of concrete policy implications about immigration and the preconditions for citizenship clearly spelled out. And it asks what civic empowerment could mean in a globalizing world.

A General Theory of Constitutional Patriotism Jan-Werner Müller, 2010 This article offers a theory of constitutional patriotism independent of the controversial social theories of modernization and rationalization with which Jürgen Habermas's version of constitutional patriotism is associated. It argues that the purpose of constitutional patriotism as a set of beliefs and dispositions is to enable and uphold a liberal democratic form of rule that free and equal citizens can justify to each other. The object of patriotic attachment is a specific constitutional culture that mediates between the universal and the particular while the mode of attachment is one of critical judgment. Finally, constitutional patriotism results in a number of policy recommendations that are clearly different from policies that liberal nationalists would advocate.

Constitutional Patriotism: Four European Reincarnations and the Russian Version Игорь Барциц, 2019-07-15 This study examines the theory of constitutional patriotism with respect to the interests and needs of constitutional and legal development of Russia. The author pays special attention to the views of German legalists and philosophers as originators of this legal theory. Thoroughly analyzing foreign documents that define the content and purpose of constitutional patriotism and give examples of countries using this concept as a basis of their national development as well as shaping of the European Union's common identity, the author explores its relevance for the legal doctrine of the Russian Federation and other countries.

Revisiting Constitutional Patriotism Beyond Constitutionalism Hande Gürdağ, Hande Gürdağ, 2014-01 Among many formulations towards an arbitrated definition of European identity, Jürgen Habermas's interpretation of the term through the concept of constitutional patriotism is worth scrutinizing. The notion of constitutional patriotism was especially relevant whilst drafting and discussing the possible implications of an EU Constitution in 2004. However, the no votes in

referendums in France and Netherlands abolished the possibility of a constitution for EU thus changing the nature and the focus of discussions on European identity Despite all this Habermas s constitutional patriotism has still plenty to offer to contribute to those debates This book aims to elaborate the post constitutional debates and the possibility of the evolution of the concept constitutional patriotism beyond constitutionalism The new forms of interpretation of the term and its relevance to European identity and thereby the real feasibility of the term is thus inquired Certain advantages and weak points of Jurgen Habermas s constitutional patriotism concept in creating a shared feeling of belonging and the criticisms against the term are also analyzed Constitutional Law and Regionalism Vito Breda,2018-09-28 This topical book analyses the practice of negotiating constitutional demands by regional and dispersed national minorities in eight multinational systems It considers the practices of cooperation and litigation between minority groups and central institutions in Australia Britain Canada New Zealand Italy Spain and the U S and includes an evaluation of the implications of the recent Catalan Puerto Rican and Scottish referenda Ultimately the author shows that a flexible constitution combined with a versatile constitutional jurisprudence tends to foster institutional cooperation and the recognition of the pluralistic nature of modern states

Constitutional Patriotism and Militant Moderation Karol Edward Soltan,2010 Constitutional patriotism is a form of political loyalty combining a commitment to universal principles with a love of a unique object of loyalty and with a special connection to a constitution This paper outlines a version of constitutional patriotism with three distinctive characteristics First constitutions are not the object of the loyalty but its most important expression Second constitutions are seen as commitments to a certain form of moderate politics And finally constitutional patriotism can be directed toward many different objects of loyalty but only when it can be simultaneously directed toward a universal civilization Constitutional patriotism seems to be the best possible form of political loyalty and hence the form we should adopt Loyalty is not necessarily always a virtue But a certain form of loyalty constitutional patriotism to individuals and groups institutions and causes that deserve loyalty is a virtue There are many conceptions of constitutional patriotism this paper argues in favor of one that expresses a passionate ambitious and militant moderation *Developing a Constitution for Europe* Erik Oddvar Eriksen,John Erik Fossum,Agustín Menéndez,2004-08-02 The European Union is currently in the midst of a comprehensive process of reform and the aim of this book is to address the challenge of forging a legitimate Constitution for the EU These authors clarify the constitutional status of the EU to take stock of the European Charter of Fundamental Rights and Convention of the Future of Europe as vehicles to foster and create a European constitution *Political Concepts* Richard Bellamy,Andrew Mason,2003-08-02 Table of contents Limitations of National Sovereignty through European Integration Rainer Arnold,2016-02-25 The book considers the changes which national sovereignty has undergone through the supranational European integration In various contributions by renowned academics and high judges demonstrate the serious impacts of supranationality on the EU member states and even on third countries which are connected with the EU

by international treaties It becomes clear that primacy of EU law the most significant expression of supra nationality collides with national sovereignty as anchored in the national constitutions The studies clearly show that most member states do not fully deny EU law primacy but are aware of the need to find an adequate balance between the supranational and the national orders The result from the analyses of the authors from various European countries is that the upcoming constitutional paradigm is constitutional identity a concept established by jurisprudence in Germany France Czech Republic without being named so and debated also in Poland which herself denies supranational impact on the national Constitution entirely Studies on selected EU member states clarify the specific national approaches towards the limitations of their sovereignty as developed by the constitutional jurisprudence Poland Czech Republic Hungary Romania Italy Germany with comparative references to United Kingdom and France It is illuminated that traditionally strong sovereignty concepts UK France are considerably relativized and functionally opened towards the integration challenges Basic issues are furthermore reflected such as the supranational impact on the State s power to reform its Constitution the relation of national and constitutional identity and the national and supranational perspectives of identity The book also includes Europe beyond the EU by research on the supranational character of association treaties from a Ukrainian perspective and on the Europeanization of a third country preparing EU membership Albania

The Incoherence of the Patriotic State; a Critique of Constitutional Patriotism Vito Breda, 2015 Habermas proposes a new solution to the problematic relation between republican values and democracy He asserts that a new model of social cohesion is needed and he suggests that the sense of community in a democratic society should be founded exclusively on the acceptance and support of a system of constitutionally established rules which are the logical result of the historical evolution of constitution making He argues that an account of the constitutional process which led to the formation of the modern republican state should provide the criteria for a rational set of norms which will exclude nationalism from the political arena In this article I point out the democratic hazards and the internal incoherence of Habermas s alternative to the national state and I argue that a theoretical substitute should consider the existence of national identities as one of the aspects of modern pluralistic society
