### **Health and Safety Requirements in Construction**

**Contract Documents**, 2005      **Industrial Safety and Risk Management** Laird Wilson, Doug McCutcheon, Marilyn Buchanan, University of Alberta. Faculty of Engineering. Industrial Safety & Loss Management Program, 2003-08-15. The industrial workplace should be an environmentally sound and reliable operation with established safety and health policies and practices. Most companies work hard to achieve this goal by having Industrial Safety and Risk Management programs in place. The key benefits of a first class ISRM program are the reduction of risk to people, environment, assets, and production for company personnel, contractors, the public, and investors. Professors Wilson and McCutcheon offer an integrated approach to industrial safety and risk management and explain the elements of practice required to manage health, safety, and environmental risk effectively. Contributors from industry and government add their expertise to provide a comprehensive examination of issues concerning industrial health, safety, and risk management programs, risk assessment and management, causation models, and systematic incident investigation and human factors. Case studies of industrial disasters offer lessons in how to proactively reduce risks in operations or projects. Industrial Safety and Risk Management provides a solid base for students and industry to implement, manage, and improve their understanding and knowledge of safety and risk management programs. It provides an excellent training program for new professionals, junior managers, and supervisors working in industry.
